Face Detection And Recognition On Mobile Devices:

Face Detection and Recognition on Mobile Devices Haowei Liu, 2014-11-25 This hands on guide gives an overview of computer vision and enables engineers to understand the implications and challenges behind mobile platform design choices Using face related algorithms as examples the author surveys and illustrates how design choices and algorithms can be geared towards developing power saving and efficient applications on resource constrained mobile platforms Presents algorithms for face detection and recognition Explains applications of facial technologies on mobile devices Includes an overview of other computer vision technologies

Spatially Enhanced Local Binary Patterns for Face Detection and Recognition in Mobile Device Applications Jeaff Zheng Wang, 2013 *Proceedings of the International Conference on Artificial Intelligence and Computer Vision (AICV2021)* Aboul Ella Hassanien, Abdelkrim Haqiq, Peter J. Tonellato, Ladjel Bellatreche, Sam Goundar, Ahmad Taher Azar, Essaid Sabir, Driss Bouzidi, 2021-05-28 This book presents the 2nd International Conference on Artificial Intelligence and Computer Visions AICV 2021 proceeding which took place in Settlat Morocco from June 28 to 30 2021 AICV 2021 is organized by the Scientific Research Group in Egypt SRGE and the Computer Networks Mobility and Modeling Laboratory IR2M Hassan 1st University Faculty of Sciences Techniques Settlat Morocco This international conference highlighted essential research and developments in the fields of artificial intelligence and computer visions The book is divided into sections covering the following topics Deep Learning and Applications Smart Grid Internet of Things and Mobil Applications Machine Learning and Metaheuristics Optimization Business Intelligence and Applications Machine Vision Robotics and Speech Recognition Advanced Machine Learning Technologies Big Data Digital Transformation AI and Network Analysis Cybersecurity Feature Selection Classification and Applications

Selfie Biometrics Ajita Rattani, Reza Derakhshani, Arun Ross, 2019-09-21 This book highlights the field of selfie biometrics providing a clear overview and presenting recent advances and challenges It also discusses numerous selfie authentication techniques on mobile devices Biometric authentication using mobile devices is becoming a convenient and important means of verifying identity for secured access and services such as telebanking and electronic transactions In this context face and ocular biometrics in the visible spectrum has gained increased attention from the research community However device mobility and operation in uncontrolled environments mean that facial and ocular images captured with mobile devices exhibit substantial degradation as a result of adverse lighting conditions specular reflections and motion and defocus blur In addition low spatial resolution and the small sensor of front facing mobile cameras further degrade the sample quality reducing the recognition accuracy of face and ocular recognition technology when integrated into smartphones Presenting the state of the art in mobile biometric research and technology and offering an overview of the potential problems in real time integration of biometrics in mobile devices this book is a valuable resource for final year undergraduate students postgraduate students engineers researchers and academics in various fields of computer engineering

Inventive Systems and Control V. Suma, Joy Iong-Zong

Chen,Zubair Baig,Haoxiang Wang,2021-06-07 This book presents selected papers from the 5th International Conference on Inventive Systems and Control ICISC 2021 held on 7 8 January 2021 at JCT College of Engineering and Technology Coimbatore India The book includes an analysis of the class of intelligent systems and control techniques that utilises various artificial intelligence technologies where there are no mathematical models and systems available to make them remain controlled Inspired by various existing intelligent techniques the primary goal is to present the emerging innovative models to tackle the challenges faced by the existing computing and communication technologies The proceedings of ICISC 2021 aim at presenting the state of the art research developments trends and solutions for the challenges faced by the intelligent systems and control community with the real world applications The included research articles feature the novel and unpublished research works on intelligent system representation and control **Intelligent Data Engineering and Analytics** Suresh Chandra Satapathy,Yu-Dong Zhang,Vikrant Bhateja,Ritanjali Majhi,2020-08-29 This book gathers the proceedings of the 8th International Conference on Frontiers of Intelligent Computing Theory and Applications FICTA 2020 held at NIT Surathkal Karnataka India on 4 5 January 2020 In these proceedings researchers scientists engineers and practitioners share new ideas and lessons learned in the field of intelligent computing theories with prospective applications in various engineering disciplines The respective papers cover broad areas of the information and decision sciences and explore both the theoretical and practical aspects of data intensive computing data mining evolutionary computation knowledge management and networks sensor networks signal processing wireless networks protocols and architectures Given its scope the book offers a valuable resource for graduate students in various engineering disciplines *Fog and Edge Computing* Rajkumar Buyya,Satish Narayana Srirama,2019-01-30 A comprehensive guide to Fog and Edge applications architectures and technologies Recent years have seen the explosive growth of the Internet of Things IoT the internet connected network of devices that includes everything from personal electronics and home appliances to automobiles and industrial machinery Responding to the ever increasing bandwidth demands of the IoT Fog and Edge computing concepts have developed to collect analyze and process data more efficiently than traditional cloud architecture Fog and Edge Computing Principles and Paradigms provides a comprehensive overview of the state of the art applications and architectures driving this dynamic field of computing while highlighting potential research directions and emerging technologies Exploring topics such as developing scalable architectures moving from closed systems to open systems and ethical issues rising from data sensing this timely book addresses both the challenges and opportunities that Fog and Edge computing presents Contributions from leading IoT experts discuss federating Edge resources middleware design issues data management and predictive analysis smart transportation and surveillance applications and more A coordinated and integrated presentation of topics helps readers gain thorough knowledge of the foundations applications and issues that are central to Fog and Edge computing This valuable resource Provides insights on transitioning from current Cloud centric and
