## *10. Challenges to Development II: From Women-in-Development to Gender Mainstreaming* *Naila Kabeer*

One of the earliest expressions of **dissent with modernization** and “trickle down” approaches to development came from **feminist constituencies**. Some argued that the assumed **benefits of development were unevenly distributed between men and women** and that development could exacerbate the gender gap in access to resources. Starting from a plea in the 1970s to “include” women in development, the field has moved on to acknowledging gender as one of the **central axes of power** differentials in society. Gender analysis in development planning and gender “**mainstreaming**” in institutional design are now an accepted part of the development lexicon.

(a) gender relations

OR

(b) environmental issues

as merely additional items on the development policy agenda?
