Manual Dexterity, Grip Strength and Level of Endurance John Thomas Pfitzer, ARMY MATERIEL COMMAND
TEXARKANA TEX INTERN TRAINING CENTER., 1970 The research is designed to answer the following questions Does prior loading in terms of grip holding cause a decrement in manual dexterity if a decrement does exist how long does it last and

can decrement be predicted from the amount of endurance to which subjects are loaded In answering these questions ten male subjects were tested for manual dexterity using a Purdue Pegboard Conclusions drawn from analyses are as follows muscular loading in the form of grip holding causes a decrement in manual dexterity this decrement lasts for a period of ten seconds or less and there is a relationship between the amount of endurance required by loading and the decrement caused by that loading Author *Gorilla Grip* Rahul Mookerjee,2017-11-08 Do you secretly wish you got comments like the below most of the time You ve got unnatural pulling power It has to be something to do with the exercises you do from folks that outweigh me by about a 1000 pounds well not really but you get the drift and folks from various disciplines of life including but not limited to those from the elite forces boxers weightlifters and the like You need to take it easy man when shaking hands with folks Man you re a skinny dude and yet you ve got this amazing grip strength not to mention the fact you re in shape Farmers wrestlers strongmen note I mean STRONG men not the bloated muscle boys you see preening their stuff in the gyms tennis players elite forces all over the world and martial artists What do the following groups of people have in common other than the fact they perform different types of physical activity on a regular and daily basis Some may have bulging muscles and some may not Some may be ripped to shreds UGH I think I m going to rip the next book apart that spouts that sort of nonsense and others might be solidly built Some might even need to lose a bit of weight while others might be so skinny you could hang a pair of freshly pressed trousers on them So and again what do these people all have in common Strength and stamina I hear some of you say Well good answer but what else A STRONG GRIP A farmer for instance might not have archetypical show muscles but grip his hand at the end of a long hard day his spent working on the farm and you ll quickly experience the closest thing you can to an actual gorilla s grip A wrestler s forearm might not look pretty and neither might his calloused and bandaged hands but those very mitts can take the typical bodybuilder s arm in a vice like grip that the bodybuilder would be hard pressed to even TRY and escape from and do things with it that would have the average pretezel blushing with shame that old line twist you into a pretezel A tennis player martial artist a boxer a gymnast you name it and the list goes on and on all people that perform physical activity on a daily basis different sorts but they have all that ONE thing in common i e a strong bone crushing vice like grip And this my friend is one of the most important parts of a human being s overall physical development The forearms fingers and wrist are what make up the gripping muscles and you use these in virtually ALL situations in daily life from carrying groceries up the stairs to lugging heavy furniture around To put it another way showy biceps might help you get the lady for instance but couple those with weak forearms and you ll never be able to carry her up that flight of stairs to your apartment You might be able to curl impressive poundages in the gym using straps and other aids but when it comes to doing pull ups on a thick bar a weak grip is what will let you down the most On the other hand a strong grip is an advantage in just about every situation The PLETHORA of exercises that I give you in 0 Excuses Fitness do a great job of building a vice like bone crushing grip and truth be told that s all you need if you

do em right and yet there are those that want MORE Well I wrote Gorilla Grip for those of you that want more And here it is 16 exercises that should be done IN ADDITION to or in CONJUNCTION with NOT in place of the exercises I mention in 0
