Irony Stories For Kids:

Telling Children's Stories Michael Cadden, 2011 The most accessible approach yet to children's literature and narrative theory Telling Children's Stories is a comprehensive collection of never before published essays by an international slate of scholars that offers a broad yet in depth assessment of narrative strategies unique to children's literature The volume is divided into four interrelated sections Genre Templates and Transformations Approaches to the Picture Book Narrators and Implied Readers and Narrative Time Mike Cadden's introduction considers the links between the various essays and topics as well as their connections with such issues as metafiction narrative ethics focalization and plotting Ranging in focus from picture books to novels such as *To Kill a Mockingbird* from detective fiction for children to historical tales from new works such as the Lemony Snicket series to classics like *Tom's Midnight Garden* these essays explore notions of montage and metaphor perspective and subjectivity identification and time Together they comprise a resource that will interest and instruct scholars of narrative theory and children's literature and that will become critically important to the understanding and development of both fields

Metaphor and Thought Andrew Ortony, 1993-11-26 *Metaphor and Thought* first published in 1979 reflects the surge of interest in and research into the nature and function of metaphor in language and thought In this revised and expanded second edition the editor has invited the contributors to update their original essays to reflect any changes in their thinking Reorganised to accommodate the shifts in central theoretical issues the volume also includes six new chapters that present important and influential fresh ideas about metaphor that have appeared in such fields as the philosophy of language and the philosophy of science linguistics cognitive and clinical psychology education and artificial intelligence

Stories, Pictures And Reality Virginia Lowe, 2007 *Stories Pictures and Reality* follows two children as they work out the reality status of stories and pictures with a daily parent observer record from the birth of the first child until the second is eight a span of eleven years in all Together these children pick through the meaning of stories and the motivations of the characters they discover in this unique first hand description of the discernment that children bring to books from an early age full of revealing quotes that tell us a great deal about the cognitive development of our young readers It's a joke cause it couldn't really have happened I'll tell you what's pretend Batman Robin Superman pirates cowboys and Indians Pussy cats don't fly kites The man who drew it was wrong In analysis this longitudinal study shows that children have more insight and understanding than they are often given credit for and that they approach subjects that puzzle the most sophisticated of thinkers with an elegant simplicity beyond the expectations of conventional psychologists and children's literature commentators This book urges readers especially practitioners and academics to afford greater respect to what young children are capable of in this area
