Basis	Monopolistic competition	Oligopoly
Type of product	Firms sell differentiated products	Firms sell homogeneous or differentiated products
Entry and Exit	There is a free entry of firms.	Entry of firms is restricted.
Control over market price	Every firm has fairly large control over price of its own product	Each firm exercises substantial control over price.

(Candidates are required to state any one difference between the two market forms. The differences must be written in a complete sentence and not in a phrase or captions. There must be a common basis of contrast.)

- (xi) When $C > Y$, $APC = C/Y > 1$; but MPC is always less than 1 because increase in consumption expenditure is always less than increase in income as a part of increased income is used for saving as well. [1]
