**Integration** Mokubung O. Nkomo, Carolyn McKinney, Linda Chisholm, 2004 School integration means among other things that the divisions created by apartheid need to be addressed systematically and systemically Integration is not merely about changing the racial demographics of learner and educator bodies It means schools changing to meet the needs of all children fostering meaningful interaction among learners in the classroom on the playground and in extra mural activities as well as instilling a human rights culture It means constructing curricula texts and pedagogies that are informed by a democratic ethos and it requires teachers school managers and communities that are equipped to promote a democratic school environment In short it is about inclusivity and social cohesion And the issue of integration is as pertinent internationally as it is in South Africa questions of race racism citizenship and diversity are central to school systems throughout the world This book contains the proceedings of a colloquium held in October 2003 attended by leading South African and international researchers to take stock of the status quo in school integration and identify new directions research should be taking to support the process of change **Drawing for Science Education** Phyllis Katz, 2017-03-23 This book argues for the

essential use of drawing as a tool for science teaching and learning The authors are working in schools universities and continual science learning CSL settings around the world They have written of their experiences using a variety of prompts to encourage people to take pen to paper and draw their thinking sometimes direct observation and in other instances their memories The result is a collection of research and essays that offer theory techniques outcomes and models for the reader Young children have provided evidence of the perceptions that they have accumulated from families and the media before they reach classrooms Secondary students describe their ideas of chemistry and physics Teacher educators use drawings to consider the progress of their undergraduates understanding of science teaching and even their moral ethical responses to teaching about climate change Museum visitors have drawn their understanding of the physics of how exhibit sounds are transmitted A physician explains how the history of drawing has been a critical tool to medical education and doctor patient communications Each chapter contains samples insights and where applicable analysis techniques The chapters in this book should be helpful to researchers and teachers alike across the teaching and learning continuum The sections are divided by the kinds of activities for which drawing has historically been used in science education An instance of observation Audubon
