- (a) Identify the groups created by the policy, management, system and the system's objectives, the system's components and identify any interdependencies.
- (b) Document the objectives and measures of these groups.
- (c) Document system and control models to ensure that the objectives and measures of these processes are sufficient.
- (d) Document the measures of the system and sufficient accuracy to support the objectives and measures of these processes.
- (e) Measure, monitor and maintain these processes and
- (f) Implement control measures to ensure proper control and maintain improvement of these processes.
- (g) When goals have been met, suspend control of the measured process and

All personal data will be subject to regular audits, including an ongoing, internal audit, to ensure that the data is accurate and up-to-date.

The responsibility of the research and the responsibility of each individual researcher concerned is clearly to be understood and accepted by the research team. For example, under 'Quality Management' (see Table 1), it is stated that 'the research team is responsible for the quality of the research'.

These problems arise in applying the spatial econometrics to a regression. The regression is the spatial regression and must be the member of the various geographies, from the national, regional, county.

Therapeutic Index Assessment and **Toxicity Index** are both methods used to assess the potential for a drug to cause harm. The **Therapeutic Index** is a ratio of the **LD50** (the dose that causes death in 50% of the population) to the **ED50** (the dose that causes a therapeutic effect in 50% of the population). A high **Therapeutic Index** indicates a drug is relatively safe, while a low **Therapeutic Index** indicates a drug is more likely to cause harm. The **Toxicity Index** is a ratio of the **TD50** (the dose that causes a toxic effect in 50% of the population) to the **ED50**. A high **Toxicity Index** indicates a drug is relatively safe, while a low **Toxicity Index** indicates a drug is more likely to cause harm.
