*New Science of Learning* Myint Swe Khine,Issa M. Saleh,2010-06-16 The earliest educational software simply transferred print material from the page to the monitor Since then the Internet and other digital media have brought students an ever expanding low cost knowledge base and the opportunity to interact with minds around the globe while running the risk of shortening their attention spans isolating them from interpersonal contact and subjecting them to information overload The New Science of Learning Cognition Computers and Collaboration in Education deftly explores the multiple relationships found among these critical elements in students increasingly complex and multi paced educational experience Starting with instructors insights into the cognitive effects of digital media a diverse range of viewpoints with little consensus this cutting edge resource acknowledges the double edged potential inherent in computer based education and its role in shaping students thinking capabilities Accordingly the emphasis is on strategies that maximize the strengths and compensate for the negative aspects of digital learning including

Group cognition as a foundation for learning Metacognitive control of learning and remembering Higher education course development using open education resources Designing a technology oriented teacher professional development model Supporting student collaboration with digital video tools Teaching and learning through social annotation practices The New Science of Learning Cognition Computers and Collaboration in Education brings emerging challenges and innovative ideas into sharp focus for researchers in educational psychology instructional design education technologies and the learning sciences

*Sustainability, Green IT and Education Strategies in the Twenty-first Century* Tomayess Issa, Pedro Isaías, Theodora Issa, 2017-07-26 This work presents and discusses the latest approaches and strategies for implementing Sustainability and Green IT into higher education and business environments Following the global financial crisis in 2007 2008 businesses began to struggle coping with the increased IT IS cost and their environmental footprint As a consequence action by universities to incorporate sustainability and Green IT as parts of their teaching and learning materials acknowledging their importance for global and local businesses is being increasingly implemented The book addresses the cooperation and coordination between academics and practitioners needed in order to achieve the changes required to obtain sustainability Intended for researchers lecturers and post graduate students as well as professionals in the Information Society and ICT and education sectors and policy makers
