Environment, Health and Sustainable Development Emma Hutchinson, Sari Kovats, 2017-02-16 Longstanding evidence of the links between the environment development and human health has led to a recognition of the need for public health policy to address sustainable development in low middle and high income countries One of the great challenges for public

*Poverty Alleviation and Environmental Law* Yves Le Bouthillier,Miriam Alfie Cohen,Jose Juan Gonzalez Marquez,Albert Mumma,Susan Smith,2012-01-01 The alleviation of poverty and the protection of the environment are both critical challenges for the vindication of basic human rights for all of humankind This relationship is however not necessarily an easy one While there is an inextricable link between poverty and the degradation of the environment a sophisticated analysis of a problem needs to deal with those cases where the need to increase economic opportunity for poor communities may appear to conflict with fragile ecosystems or the preservation of traditional practices This collection provides the most sustained engagement with these problems Drawing on the expertise of a range of distinguished authors this book presents the reader with an integrated global engagement with these problems In doing so it represents a landmark effort towards the creation of a coherent literature to deal with one of humankind s most pressing challenges Dennis Davis Judge of the High Court South Africa The complex uneven and challenging relationships between poverty alleviation and environmental regulation are impossible to trace in a single book but this collection brings a carefully selected set of policy relevant context responsive

practical legal analyses to bear in a fresh examination of the present and future challenges involved This is a timely contribution in the search for regulatory responses that alleviate rather than exacerbate the myriad forms of adaptation apartheid now so painfully evident in the relationship between poverty injustice and environmental degradation Anna Gear University of Waikato New Zealand The subject of poverty cannot be ignored by environmentalists as the poor are the most affected by the diverse impacts of environmental degradation and climate change such as on water natural resources and cultural heritage sites In addition slum dwellings exacerbate the plight of the poor The book is a collection of diverse topics by renowned environmental legal experts which deal with the relationship between the alleviation of poverty and the protection of the environment Each writer addresses the challenges raised in various issues and recommends solutions which range from linking with human rights the need for public participation the role of environmental courts and other mechanisms Koh Kheng Lian National University of Singapore This timely book explores the complex relationship between the alleviation of poverty and the protection of the environment There is every reason to believe that these issues are in many ways interdependent However this book demonstrates that there are situations where alleviation of poverty and the protection of the environment appear to be in a fraught relationship The contributing authors illustrate that the role played by law in this relationship whether at the international or national level will vary depending on the situation and will be more successful at pursuing environmental justice in some cases than in others This interdisciplinary study will appeal to academics and students in environmental law and other environmental disciplines environmental policymakers and NGOs interested in issues of poverty environment and indigenous peoples
