

Question 1 (1 point)

Which of the following is NOT a characteristic of a good research question?

- ☐ It is clear and specific.
- ☐ It is broad and general.
- ☐ It is measurable and testable.
- ☐ It is relevant.

Correct Answer: B (broad and general)

Good research questions should be specific and measurable, and they should be relevant to the study. They should also be broad enough to allow for a range of possible outcomes, but not so broad that they are untestable. Therefore, the correct answer is B (broad and general).

Question 2 (1 point)

- ☐ A
- ☐ B
- ☐ C
- ☐ D

Correct Answer: B (negative correlation)

Scatter plots are used to show the relationship between two variables. A positive correlation means that as one variable increases, the other variable also tends to increase. A negative correlation means that as one variable increases, the other variable tends to decrease. No correlation means that there is no relationship between the two variables. Therefore, the correct answer is B (negative correlation).
