greater than 0.40 they can accelerate student achievement. The power of the Visible Learning research lies in helping educators understand which factors have the highest impact on student achievement so that educators can begin making strategic decisions based on evidence that will utilize their time, energy, and resources to the best extent possible. The Visible Learning research is based on Professor John Hattie's unmatched meta-analysis of more than 1600 research reviews comprising 95,000 studies involving more than 300 million students, the world's largest evidence base on what works best in schools to improve student learning. From that research, Dr. Hattie identified more than 250 factors that have an impact on student achievement. View a full list of Visible Learning Supporting Resources.

A Program in Contemporary Algebra: Exponents, radicals, and quadratic equation Ralph T. Heimer, Frank Kocher, John J. Lottes, 1963 *Multi-Criteria Decision Analysis via Ratio and Difference Judgement* Freek A. Lootsma, 2007-08-23. The point of departure in the present book is that the decision makers involved in the evaluation of alternatives under conflicting criteria express their preferential judgement by estimating ratios of subjective values or differences of the corresponding logarithms, the so-called grades. Three MCDA methods are studied in detail: the Simple Multi-Attribute Rating Technique (SMART) as well as the Additive and the Multiplicative AHP, both pairwise comparison methods which do not suffer from the well-known shortcomings of the original Analytic Hierarchy Process. Context-related preference modelling on the basis of psycho-physical research in visual perception and motor skills is extensively discussed in the introductory chapters. Thereafter, many extensions of the ideas are presented via case studies in university administration, health care, environmental assessment, budget allocation, and energy planning at the national and the European level. The issues under consideration are group decision making with inhomogeneous power distributions, the search for a compromise solution, resource allocation, and fair distributions. Scenario analysis in long-term planning, conflict analysis via the pairwise comparison of concessions, and multi-objective optimization. The final chapters are devoted to the fortunes of MCDA in the hands of its designers. The research started in the late seventies when I got involved in three different problems: the nomination procedures in a university, the evaluation of alternative energy research proposals, and the evaluation of non-linear programming software.

Math Phonics - Pre-Algebra Marilyn B. Hein, 2004-03-01. Basic math skills to prepare them for algebra. Her fun methods and concrete examples will help younger students begin to grasp the principles of algebra before they actually have to deal with the complete course. Included are easy-to-understand explanations and instructions, wall charts, games, activity pages, and worksheets. As in all her Math Phonics books, the author emphasizes three important principles: understanding, learning, and mastery. Students will learn about integers, exponents, and scientific notation, expressions, graphing, slope, binomials, and trinomials. In addition to helpful math rules and facts, a complete answer key is provided. As students enjoy the quick tips and alternative techniques for math mastery, teachers will appreciate the easy-going approach to a difficult subject.
