## **Exponents In Word Problems:**

**The Compressed Word Problem for Groups** Markus Lohrey, 2014-04-04 The Compressed Word Problem for Groups provides a detailed exposition of known results on the compressed word problem emphasizing efficient algorithms for the compressed word problem in various groups The author presents the necessary background along with the most recent results on the compressed word problem to create a cohesive self contained book accessible to computer scientists as well as mathematicians Readers will quickly reach the frontier of current research which makes the book especially appealing for students looking for a currently active research topic at the intersection of group theory and computer science The word problem introduced in 1910 by Max Dehn is one of the most important decision problems in group theory For many groups highly efficient algorithms for the word problem exist In recent years a new technique based on data compression for providing more efficient algorithms for word problems has been developed by representing long words over group generators in a compressed form using a straight line program Algorithmic techniques used for manipulating compressed words has shown that the compressed word problem can be solved in polynomial time for a large class of groups such as free groups graph groups and nilpotent groups These results have important implications for algorithmic questions related to automorphism groups

**Exponential Genus Problems in One-Relator Products of Groups** Andrew James Duncan, 2007 Exponential equations in free groups were studied initially by Lyndon and Schutzenberger and then by Comerford and Edmunds Comerford and Edmunds showed that the problem of determining whether or not the class of quadratic exponential equations have solution is decidable in finitely generated free groups In this paper the author shows that for finite systems of quadratic exponential equations decidability passes under certain hypotheses from the factor groups to free products and one relator products
