

**DIRECTIONS**

Make sure you

- show all your work in solving the problem,
- clearly label your answer,
- tell in words how you solved the problem,
- tell in words why you took the steps you did to solve the problem, and
- write as clearly as you can.

To solve this problem first I, made 19 wheels because I could make the problem easier by putting an arrow and a B or T for bike 2 wheels or trike 3 wheels. Next I, made bikes but when I only had 3 wheels left I stopped because if I made another bike I'd only have 1 wheel left and there's nothing with 1 wheel. Then I, made the last 3 wheels a trike because 3 wheels would make a trike and if I made another bike I'd only have 1 wheel but we don't have any unicycles finally I wrote      Bikes and      Trike and put in my answer of 8 bikes and 1 trike

### **Extended Response Math Questions 3rd Grade:**

**High-Stakes Testing** R. Murray Thomas, 2005-03-23 The federal government's No Child Left Behind Act has thrust high stakes testing into the educational limelight. The four-fold purpose of this book is to describe the nature of high stakes testing, identify types of collateral damage that have attended the testing programs, analyze methods different groups of people have chosen for coping with the damage, and suggest lessons to be learned from the high stakes testing experience. The six groups of people whose coping strategies are inspected include politicians and their staffs, educational administrators and their staffs, parents and the public, test makers and test administrators, teachers, and students. Importantly, the author avoids aligning himself with the test-bashing rhetoric of those who oppose high stakes testing, especially the No Child Left Behind Act. Key features of this outstanding new book include illustrative cases. The book offers more than 350 cases of collateral damage from high stakes testing and people's coping strategies as reported in newspapers over the 2002-2004 period. Background perspectives: Part I examines the influence of high stakes testing on 1) what schools teach, 2) how student progress is evaluated, 3) how achievement standards are set, and 4) how test results are used. Participant responses: Part II, which is the heart of the book, devotes a separate chapter to the coping strategies of each of the major participants in the high stakes testing movement: politicians and their staffs, educational administrators and their staffs, parents and the public, test makers and test givers, teachers, and students. Summary chapter: The last chapter, Lessons to Learn, offers suggestions for minimizing collateral damage by adopting alternative approaches not used in the creation of our current high stakes testing programs, particularly the federal government's No Child Left Behind Act. This book is appropriate for any of the following audiences: students taking evaluation or administration courses in schools of education, inservice administrators and teachers, policy makers, and those members of the general public who are concerned about the fate of schooling in America. *Math in a Minute, Grade 3* Brighter Child, 2014-02-03 Math in a Minute for grade 3 includes essential math skills such as multiplying and dividing within 100, solving problems using addition, subtraction, multiplication, and division, and understanding the place value system.
