Mobility and Migration Choices Martin van der Velde, Ton van Naerssen, 2016-03-03 The crossing of national state borders is one of the most discussed issues of contemporary times and it poses many challenges for individual and collective identities This concerns both short distance mobility as well as long distance migration Choosing to move or not across international borders is a complex decision involving both cognitive and emotional processes This book tests the approach that three crucial thresholds need to be crossed before mobility occurs the individual's mindset about migrating the choice of destination and perception of crossing borders to that location and the specific routes and spatial trajectories available to get there Thus both borders and trajectories can act as thresholds to spatial moves The threshold approach with its focus on processes affecting whether when and where to move aims to understand the decision making process in all its dimensions in the hope that this will lead to a better understanding of the ways migrants conceive perceive and undertake their transnational journeys This book examines the three constitutive parts discerned in the cross border mobility decision making process people borders and trajectories and their interrelationships Illustrated by a global range of case studies it demonstrates that the relation between the three is not fixed but flexible and that decision making contains aspects of belonging instability security and volatility affecting their mobility or immobility

How to Disappear Akiko Busch, 2020-02-11 It is time to reevaluate the merits of the inconspicuous life to search out some antidote to continuous exposure and to reconsider the value of going unseen undetected or overlooked in this new world Might invisibility be regarded not simply as refuge but as a condition with its own meaning and power The impulse to escape notice is not about complacent isolation or senseless conformity but about maintaining identity autonomy and voice In our networked and image saturated lives the notion of disappearing has never been more alluring Today we are relentlessly encouraged even conditioned to reveal share and promote ourselves The pressure to be public comes not just from our peers but from vast and pervasive technology companies that want to profit

from patterns in our behavior A lifelong student and observer of the natural world Busch sets out to explore her own uneasiness with this arrangement and what she senses is a widespread desire for a less scrutinized way of life for invisibility Writing in rich painterly detail about her own life her family and some of the world s most exotic and remote places she savors the pleasures of being unseen Discovering and dramatizing a wonderful range of ways of disappearing from virtual reality goggles that trick the wearer into believing her body has disappeared to the way Virginia Woolf s Mrs Dalloway finds a sense of affiliation with the world around her as she ages Busch deliberates on subjects new and old with equal sensitivity and incisiveness How to Disappear is a unique and exhilarating accomplishment overturning the dangerous modern assumption that somehow fame and visibility equate to success and happiness Busch presents a field guide to invisibility reacquainting us with the merits of remaining inconspicuous and finding genuine alternatives to a life of perpetual exposure Accessing timeless truths in order to speak to our most urgent contemporary problems she inspires us to develop a deeper appreciation for personal privacy in a vast and intrusive world

The Meritocracy Trap Daniel Markovits, 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy s successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When The Meritocracy Trap reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people

Neoliberalism, Postmodernity, and the Contemporary Memorial-Building Boom Nicola Clewer, 2022-06-06 The book develops a new approach to and a distinct reading of the contemporary memorial building boom which began in the 1980s Locating the origins of this boom in the crises associated with postmodernity and the rise of neoliberalism it analyses the complex interplay between neoliberalism postmodernism and nationalism in some of the most

well known memorials and memorial museums to have emerged in the USA and Germany over the last four decades Rather than offering a survey of contemporary memorials it traces a specific trajectory and certainly not the only one ripe for analysis from the postmodern memorials of the 1980s to the increasingly monumental and authoritative memorials and memorial museums being constructed today Developing a distinct interdisciplinary approach the book offers a critical analysis of the relationship between the memorials form the visitor experience they re intended to offer and the understanding of history and our relation to it which underpins their philosophical ethical and political stance Questioning the notion that contemporary memorials are ambiguous non ideological and non nationalistic the book argues that they are engaged in rearticulating nationalism in line with the contradictory demands of the current conjuncture As well as critically analysing the political function of national memorials the book is equally concerned with interrogating the aesthetic means they employ with a specific focus on the way in which they mobilise the power of the sublime to generate particular affective responses The book argues that contemporary national memorials reflect one of the most significant convergences between postmodern thought and neoliberal ideology both project a permanent present urging us to recreate ourselves in the light of existing conditions for there is no alternative

Chinese Foreign Relations with Weak Peripheral States Jeffrey Reeves, 2015-10-08 This book examines China s relations with its weak peripheral states through the theoretical lens of structural power and structural violence China s foreign policy concepts toward its weak neighbouring states such as the One Belt One Road strategy are premised on the assumption that economic exchange and a commitment to common development are the most effective means of ensuring stability on its borders This book however argues that China s overreliance on economic exchange as the basis for its bilateral relations contains inherently self defeating qualities that have contributed and can further contribute to instability and insecurity within China s periphery Unequal economic exchange between China and its weak neighbours results in Chinese influence over the state s domestic institutions what this book refers to as structural power Chinese structural power in turn can undermine the state s development contribute to social unrest and exacerbate existing state society tensions what this book refers to as structural violence For China such outcomes lead to instability within its peripheral environment and raise its vulnerability to security threats stemming from nationalism separatism terrorism transnational organised crime and drug trafficking among others This book explores the causality between China s economically reliant foreign policy and insecurity in its weak peripheral states and considers the implications for China s security environment and foreign policy This book will be of much interest to students of Chinese politics Asian security studies international political economy and IR in general
