

- 2 Trading through SEATS system. Common types of trades include limit orders, market orders and short sales.
- 3 Regulation is via the Corporations Act 2001 and ASX self-regulation.
- 4 Historical equity performance is measured through an index. These indices incorporate market-breadth (number of shares), weighting systems (equal, price or value-weighted), capitalisation changes (rights and/or bonus issues) and dividend effects.
- 5 Australia operates a dividend imputation system whereby investors receive a tax rebate for tax already paid by the company.

2.3 Australian debt markets

- 1 Australian debt markets are comprised of money markets (where short-term pure-discount instruments are traded) and bond markets (where longer term coupon paying instruments are traded).
- 2 Examples of money market securities include bills of exchange (e.g. bank accepted bills), promissory notes, certificates of deposit and treasury notes. Bond market securities include Commonwealth Government bonds, local or semi-government bonds, corporate bonds (e.g. debentures) and securities products (e.g. mortgages).

2.4 Australian property markets

- 1 Australian property market assets can be traded either directly or indirectly.
- 2 Direct property investments involve purchasing real estate or property, where the asset is held by the investor.
- 3 Indirect property involves the purchase of shares or units in a company that invests in property.

Solutions to text problems

Problems

- 1 There are basically two markets in equity securities. The first is the primary market. This market involves the issue of new securities whether they are initial public offers or further issues. The secondary market allows the purchase and sale of existing securities. The Australian Stock Exchange (ASX) is a centralised body, which provides a secondary market, facilitating trade in corporate and some government and semi-government financial assets. Ordinary shares of publicly listed corporations are the best known assets traded on the ASX though corporate, government and semi-government debt is also traded.
- 2 The two most common types of trades on the ASX system are market orders and limit orders. Market orders are to buy or sell a security at the prevailing price whereas limit orders specify the price to be traded.
- 3 Trading is conducted on either of two systems: ASX (based on the stock exchange system) and ASX 24 (based on the futures market system). ASX permits automated order processing

COVID-19 in the African Continent Evans Osabuohien, Gbadebo Odularu, Daniel Ufua, Romanus Osabohien, 2022-05-23 COVID-19 in the African Continent examines the development achievements and challenges that have resulted owing to COVID-19 pandemic and how these precarious socioeconomic situations are being managed in African countries

Social Investment and Social Welfare James Midgley, Espen Dahl, Amy Conley Wright, 2017-05-26 This book contributes to the growing literature on social investment by discussing the way social investment ideas have been adopted in different countries and in various academic and professional fields including social policy development studies and non-profit management Documenting the experience of implementing social investment in different communities it encourages a One World perspective that integrates these diverse experiences and promotes policy learning between different nations

Understanding Investments Nikiforos T. Laopodis, 2020-06-03 This revised and fully expanded edition of Understanding Investments continues to incorporate the elements of traditional textbooks on investments but goes further in that the material is presented from an intuitive practical point of view and the supplementary material included in each chapter lends itself to both class discussion and further reading by students It provides the essential tools to navigate complex global financial markets and instruments including relevant and classic academic research and market perspectives The author has developed a number of key innovative features One unique feature is its economic angle whereby each chapter includes a section dedicated to the economic analysis of that chapter's material Additionally all chapters contain sections on strategies that investors can apply in specific situations and the pros and cons of each are also discussed The book provides further clarification of some of the concepts

discussed in the previous edition thereby offering a more detailed analysis and discussion with more real world examples The author has added new shorter text boxes labeled Market Flash to highlight the use of or changes in current practices in the field updates on strategies as applied by professionals provision of useful information for an investor updates on regulations and anything else that might be relevant in discussing and applying a concept This second edition also includes new sections on core issues in the field of investments such as alternative investments disruptive technologies and future trends in investment management This textbook is intended for undergraduate students majoring or minoring in finance and also for students in economics and related disciplines who wish to take an elective course in finance or investments
