The Connected Company Dave Gray, Thomas Vander Wal, 2014-12-02 With a foreword by Alex Osterwalder The future of work is already here Customers are adopting disruptive technologies faster than your company can adapt When your customers are delighted they can amplify your message in ways that were never before possible But when your company s performance runs short of what you ve promised customers can seize control of your brand message spreading their disappointment and frustration faster than you can keep up To keep pace with today s connected customers

your company must become a connected company That means deeply engaging with workers partners and customers changing how work is done how you measure success and how performance is rewarded It requires a new way of thinking about your company less like a machine to be controlled and more like a complex dynamic system that can learn and adapt over time Connected companies have the advantage because they learn and move faster than their competitors While others work in isolation they link into rich networks of possibility and expand their influence Connected companies around the world are aggressively acquiring customers and disrupting the competition In The Connected Company we examine what they re doing how they re doing it and why it works And we show you how your company can use the same principles to adapt and thrive in today s ever changing global marketplace
