## Abstract

This lesson is designed to reinforce skills associated with multiplying decimals and mixed numbers and allow students to visualize the effects of multiplying by a decimal or mixed number.

## Objectives

Upon completion of this lesson, students will:

- have practiced multiplying decimals and/or mixed numbers.
- have explored the effects of multiplying decimals and mixed numbers.
- have practiced predicting the effects of multiplying a number by a decimal or mixed number.

## Standards

The activities and discussions in this lesson address the following [NCTM Standards](#):

### *Numbers and Operations*

Understand numbers, ways of representing numbers, relationships among numbers, and number systems

- work flexibly with fractions, decimals, and percents to solve problems

Understand meanings of operations and how they relate to one another

- understand the meaning and effects of arithmetic operations with fractions, decimals, and integers
- understand and use the inverse relationships of addition and subtraction, multiplication and division, and squaring and finding square roots to simplify computations and solve problems

Compute fluently and make reasonable estimates

- select appropriate methods and tools for computing with fractions and decimals from among mental computation, estimation, calculators or computers, and paper and pencil, depending on the situation, and apply the selected methods
