

			<p>Provide each student with a subtraction problem and a specific strategy (e.g., counting back, compensation).</p> <p>Students pair up and solve each other's problems using the assigned strategy.</p> <p>After solving the problems, pairs discuss the strategies used and how effective they were.</p>
<p>WP2 Day 4</p>	<p>Reflecting on the Role of Strategies and Calculators in Subtraction</p>	<p>Students will reflect on when to use mental strategies and calculators for subtraction problems.</p>	<p>Discuss different situations in which using mental strategies for subtraction is appropriate and effective.</p> <p>Compare and contrast mental strategies with using calculators for subtraction.</p> <p>Present a variety of subtraction problems and have students determine which approach (mental or calculator) is most suitable for each problem.</p> <p>Online Resource: "Using Mental Strategies and Calculators for Subtraction" by Math Playground https://www.mathplayground.com/ThinkingBlocks.html</p> <p>Activity: "Strategies Showdown" Similar to the "Strategy Showdown" game from the Addition lessons (see Day 3 of Week 1), but applied to subtraction problems.</p> <p>Divide the class into teams and present a series of subtraction problems to the teams.</p> <p>Each team must discuss and decide on the most efficient strategy to solve each problem.</p> <p>After a time limit, teams present their solutions and strategies, and the class votes on the most effective strategy for each problem.</p>

Lesson Plans Stage 3 Algebra

Jack J. Capon

Lesson Plans Stage 3 Algebra:

50 Leveled Math Problems Level 3 Linda Dacey, 2012-04-01 Developed in conjunction with Lesley University this engaging resource for third grade provides effective research based strategies to help teachers differentiate problem solving in the classroom It includes 50 leveled math problems 150 problems total an overview of the problem solving process and ideas for formative assessment of students problem solving abilities It also includes 50 mini lessons and a student activity sheet featuring a problem tiered at three levels plus digital resources that include electronic versions of activity sheets This resource was developed with College and Career Readiness in mind is aligned to the interdisciplinary themes from the Partnership for 21st Century Skills and supports core concepts of STEM instruction **Math Stuff** William N. Bailey, 2000-12 A must read for teachers of mathematics The perennial question When will I ever use this stuff prompts a parent to look deeply into his son s math program In his search for the scope and meaning of stuff he finds that the subject of math is totally unlike any other high school subject Also apparent is that promoted reforms whether politically motivated profit driven or theoretically rooted in educational psychology good or bad generally have a poor long term success rate The semi fictional often humorous style of Math Stuff provides a multi dimensional view of the diverse elements of reform that to be effective must be jointly addressed Taking a cue from a good math teacher the book does not give the answers but rather suggests what to think about while determining them **Math Lessons for a Living Education Level 3** Angela O'Dell, Kyrsten Carlson, 2016-06-20 Teach math lessons through the creative means of a life story Provide 36 weeks of instruction based on skill levels rather than grade levels Guide students by the use of inexpensive manipulatives including index cards dried beans and construction paper We often tend to compartmentalize when teaching children In real life there aren t artificial barriers between subjects For example when you are cooking or baking you have to use the skills of reading logical thinking and measuring just to name a few In driving a car you see and read road signs read maps and count miles So why do we say to children This is math this is language this is about science and nature and this is history The most natural and effective means to teach children is through life examples Content story and the ability to show math in real life make a living math book *Basic Algebra and Geometry Made a Bit Easier Lesson Plans* Larry Zafran, 2010 This is the fifth book in the Math Made a Bit Easier series by independent math tutor Larry Zafran It contains 50 abridged lesson plans covering basic algebra and geometry for a target audience of tutors parents and homeschoolers Each lesson plan includes all of the components of a typical classroom lesson such as aim motivation warm up exercises demonstrative examples questions for thought and discussion and connections to earlier and later material This book is intended to be used in strict conjunction with the fourth book of the series Basic Algebra and Geometry Made a Bit Easier Concepts Explained in Plain English The book assumes that the instructor actually knows the material him herself but could benefit from having a general guideline to follow The author makes a point of identifying the concepts which most students tend to find easy or difficult including

suggestions on how to help with the latter The book includes an introduction describing how the book can be put to best use as well as a section on how to effectively work with students who are struggling with the material The author explains that for the vast majority of students the root of the problem can be traced back to never having fully mastered basic math concepts and skills The book s lessons make frequent reference to reviewing earlier books in the series as needed so that the student masters all of the prerequisite material *Key Stage 3 Mathematics* Annie Gammon,2002 An essential file to support teachers and heads of department by bringing together all the recent developments and issues of concern in Key Stage 3 mathematics In fact it s a complete guide to successful planning teaching and assessment work as a team to develop a clear departmental vision translate that vision into planning specific examples of good practice guided INSET activities for the whole team help with differentiation classroom organisation and transition for Year 7 children Bridging the Gap Between Arithmetic & Algebra Bradley S. Witzel,2015-11-15 Although two federal panels have concluded that all students can learn mathematics and most can succeed through Algebra 2 the abstractness of algebra and missing precursor understandings may be overwhelming to many students and their teachers Bridging the Gap Between Arithmetic Algebra responds to this need for instruction and interventions that go beyond typical math lesson plans Providing a review of evidence based practices the book is an essential reference for mathematics teachers and special education teachers when teaching mathematics to students who struggle with the critical concepts and skills necessary for success in algebra Audiences General education mathematics teachers special education teachers administrators teacher educators

Implementing Change Through Learning Shirley M. Hord,James L. Roussin,2013-04-02 Lead successful lasting reform in your school or district Theres no doubt about it real educational reform happens one school at a time one classroom at a time No matter what change your school or district is facing this definitive book shows how to involve teachers and staff as partners every step of the way Shirley Hord and Gene Hall are highly acclaimed experts on K 12 change management with their Concerns Based Adoption Model CBAM a rigorously field tested approach that has benefitted schools and districts for more than two decades Now this respected team joined by co author James Roussin shares their hands on techniques with you in this practical guide This complete change management program enables you to Understand predict and address educator concerns and reactions that may arise during the change process Use a series of powerful Learning Map activities to guide and support individuals and teams to navigate their own change efforts successfully Promote collaboration and learning throughout a change initiative transforming skeptics into supporters Experience the CBAM model in action through a running case study Implementing Change Through Learning offers realistic people centered strategies that help you develop trust and credibility with all teachers and staff involved setting a foundation for reform that lasts

Resources in Education ,1999-10 **Protecting America's Competitive Edge Act (S. 2198)** United States. Congress. Senate. Committee on Health, Education, Labor, and Pensions. Subcommittee on Education and Early Childhood
