Developmental Play Assessment for Practitioners (DPA-P) Guidebook and Training Website Karin Lifter, Emanuel J. Mason, Amanda M. Cannarella, Ashley D. Cameron, 2022-03-15 Developmental Play Assessment for Practitioners DPA P Guidebook and Training Website Project Play offers a comprehensive assessment of naturally occurring play activities for evaluating young children's developmental progress accurately so that useful interventions can take place as early as possible. It can be used by practitioners in a wide range of educational and therapeutic settings and is designed to support developmental progress through planning interventions in play and using what we know about a child's progress in play to plan play-based interventions in cognition, language, motor, social, emotional, and self-help skills. The guidebook and training website provide a comprehensive introduction to how to successfully use the assessment with infants, toddlers, and young children with disabilities or at risk for disabilities. The comprehensive guidebook offers an overview of the DPA P and Project Play, defines play, discusses the background literature on play, and explains why this assessment is needed. Clear guidance helps practitioners and family members understand play, how to evaluate play, and how to use play for different purposes. The guidebook offers an introduction to the comprehensive training website and how to use it, understanding of the categories of play assessed and their definitions, guidance on how to administer the assessment and prepare a summary evaluation of a child's performance, clear instructions for the coding sheets and scoring guidelines for constructing sets of toys, guidance on taking the results of the DPA P evaluation of a child's progress in play to develop a plan of activities for intervention, explanation of how you evaluate activities at the absence, basic emergence, and mastery levels for developing a plan, suggestions for assembling sets of toys for intervention based on toys available in children's homes and early childhood settings, procedures for facilitating or teaching play activities to children who are developing more slowly than their peers, technical aspects of the assessment. To make the DPA P as flexible as possible for all practitioners, it also offers guidance on adaptations for administering the test in the coding sheets with toys to enhance cultural appropriateness for gathering the observations and for supporting interventions in play. The Developmental Play Assessment for Practitioners DPA P can be used in natural settings and takes 30 minutes to complete. It is a valuable tool for all those who serve or are training to serve young children in early childhood settings, schools, service agencies, colleges, and universities. It will be of great benefit for early intervention personnel, speech language pathologists, physical therapists, occupational therapists, and psychologists.
