Dilations

A dilation, or *similarity transformation*, is a transformation in which the lines connecting every point P with its image P' all intersect at a point C , called the **center of dilation**. $\frac{CP'}{CP}$ is the same for every point P .

The scale factor k of a dilation is the ratio of a linear measurement of the image to a corresponding measurement of the preimage. In the figure, $k = \frac{PQ'}{PQ}$.
