

## TCNJ Lesson Plan

### Patterns

Student Name: Kayla Taylor

Grade Level: Prep (5s)

Date of Lesson: Sept. 17-21, 2018

### Guiding and/or Essential Questions:

What is a pattern?

How do patterns help us determine what comes next?

### Pre-lesson Assignments and/or Student Prior Knowledge

Students have shown interest in exploring patterns during playtime, such as making a pattern with the math cubes, writing their name in a pattern, and making patterns with the shape manipulatives. Additionally, students were introduced to patterns in a whole group setting during morning meeting. Our "How many days in school?" board has led to an AB pattern and students pointed it out and identified what color should be selected the next day.

### Standards (NJ Preschool Teaching and Learning Standards 2014):

**4.3.1** Sort, order, pattern, and classify objects by non-measurable (e.g., color, texture, type of material) and measurable attributes (e.g., length, capacity, height).

Learning Objectives	Assessment
Students will create cube trains of exactly 8 cubes arranged in a pattern.	Teacher will assess each student's cube train, looking for it to be exactly 8 cubes long and arranged in a pattern. Teacher will record observations.
Students will compare repeating arrangements (patterns) and non-repeating arrangements.	Teacher will assess for understanding that patterns are repeating in a specific order and record student responses during the sorting activity.

### Materials/Resources:

Math cubes, sorting hoops

Resource for lesson idea: *Investigations in Number, Data, and Space: Kindergarten* a Pearson Curriculum Guide

### Plan for set-up/distribution/cleanup of materials:

Teacher will prepare materials before pulling students to the activity. Students will take apart their cube trains and return them to the bucket before leaving the small group activity.

### Step by Step plan:

1. Lesson Beginning (Discussion/Observations):
  1. First, I will tell the students that we are going to start investigating different ways to sort and arrange items.
  2. I will show them a cube train that has no repeating arrangement and ask them to share their observations about it.
  3. Then, I will show them a cube train with a repeating arrangement and ask them to share their observations.
  4. Lastly, I will put the cube trains next to each other and ask the students to share what they notice is the same or different about them.
