After becoming familiar with the new environment of the 2007 version, you will learn how to create and save your documents, how to enter and edit text, and how to format and print your documents. The following sections teach you how to format text, character, paragraph, and page formatting. To be able to take full advantage of Word's formatting possibilities, you will then learn how to apply a theme to a document and create styles and templates. You will then go to the next step of text management by learning how to use the Find and Replace feature, the automatic spell check, the synonym dictionary, and the translation feature. Section 8 discusses working with lengthy documents and teaches you how to create a note or a bookmark, an outline, a table of contents, an index, a bibliography, or a master document. As a Word document can contain much more than just text, you will also learn how to work with tables, graphic objects, and pictures.
