Teaching as a Design Science Diana Laurillard, 2013-06-19 Teaching is changing It is no longer simply about passing on knowledge to the next generation Teachers in the twenty first century in all educational sectors have to cope with an ever changing cultural and technological environment Teaching is now a design science Like other design professionals architects engineers programmers teachers have to work out creative and evidence based ways of improving what they do Yet teaching is not treated as a design profession Every day teachers design and test new ways of teaching using learning technology to help

their students Sadly their discoveries often remain local By representing and communicating their best ideas as structured pedagogical patterns teachers could develop this vital professional knowledge collectively Teacher professional development has not embedded in the teacher s everyday role the idea that they could discover something worth communicating to other teachers or build on each others ideas Could the culture change From this unique perspective on the nature of teaching Diana Laurillard argues that a twenty first century education system needs teachers who work collaboratively to design effective and innovative teaching Society, Culture, and STEM Caroline R. Pryor,Rui Kang,2024-11-29 Too often students are asked to participate in rather generic classroom activities such as worksheets essays and rote memorization which may not capture cultural interest or experience In Society Culture and STEM A Model for Student Engagement and Teacher Collaboration teachers will learn a team based approach to incorporating local and international cultural perspectives and experiences into a curriculum of STEM subjects This book presents a six phase process Pryor Kang Socio cultural STEM Curriculum Development Model for designing a socio cultural STEM curriculum that is integrative expansive personal and achievement oriented The Model focuses on a teacher student community outreach process ongoing evaluation solicitation of feedback and continuous improvement through curriculum redesign or reconfiguration In this process a selected set of curriculum goals interdisciplinary content learning standards and resources are coordinated purposefully to capture multiple perspectives and needs This book provides a newly developed pathway to enhancing STEM learning experiences **ENC Focus** ,1999
