Democracy and

Mathematics Education Kurt Stemhagen, Catherine Henney, 2021-05-06 In *Democracy and Mathematics Education* Kurt Stemhagen and Catherine Henney develop a way of thinking about the nature and purposes of math that is inclusive, participatory, and thoroughly human. They use these ideas to create a school mathematics experience that can enhance students' math abilities and democratic potential. They locate mathematics origins in human activity and highlight the rich but often overlooked links between mathematical activity and democratic social practices. Democratic mathematics education foregrounds student inquiry and brings to light the moral dimensions of a discipline that has both remarkable utility and inevitable limitations. For math educators, the book's humanities approach helps to see the subject anew. For philosophers, it provides an important real-world context for wrestling with perennial and timely questions engaging democratic and evolutionary theory to transform school math. This alternative approach to mathematics and mathematics education provides a guide for how to use math to make democracy a larger part of school and wider social life. 2021 Winner of the AESA Critics Choice Book Award

Charting Chicago School Reform Anthony Bryk, 2018-03-08 In 1989 Chicago began an experiment with radical decentralization of power and authority. Intertwining extensive narratives and rigorous quantitative analyses, this book tells the story of what happened to Chicago's elementary schools in the first four years of this reform. In 1989 Chicago began an experiment with radical decentralization of power and authority. This book tells the story of what happened to Chicago's elementary schools in the first four years of this reform. Implicit in this reform is the theory that expanded local democratic participation would stimulate organizational change within schools, which in turn would foster improved teaching and learning. Using this theory as a framework, the authors marshal massive quantitative and qualitative data to examine how the reform actually unfolded at the school level. With longitudinal case study data on 22 schools, survey responses from principals and teachers in 269 schools, and supplementary system-wide administrative data, the authors identify four types of school politics: strong democracy, consolidated principal power, maintenance, and adversarial. In addition, they classify school change efforts as either systemic or unfocused. Bringing these strands together, the authors determine that in about a third of the schools, expanded local democratic participation served as a strong lever for introducing systemic change focused on improved instruction. Finally, case studies of six actively restructuring schools illustrate how, under decentralization, the principal's role is recast, social support for change can grow, and ideas and information from external sources are brought to bear on school change initiatives. Few studies intertwine so completely extensive narratives and rigorous quantitative analyses. The result is a complex picture of the Chicago reform that joins the politics of local control to school change. This

volume is intended for scholars in the fields of urban education public policy sociology of education anthropology of education and politics of education Comprehensive and descriptive it is an engaging text for graduate students and upper level undergraduates Local state and federal policymakers who are concerned with urban education will find new and insightful material The book should be on reading lists and in professional development seminars for school principals who want to garner community support for change and for school community leaders who want more responsive local institutions Finally educators administrators and activists in Chicago will appreciate this detailed analysis of the early years of reform
