

## Virtual Lab – What is the internal structure of cells? Do plants and animals have the same cellular structures? What are the functions of the parts within cells?

### Directions:

- Go to our class website. Under Unit 4 Materials, click on the link for "Cell Structure Virtual Lab". Use the following information to log-in:  
*Username – npascience2017      Password – heron*
- Click on "Launch Gizmo"
- Follow the prompts below and complete all work in your notebook. You do not have to write the questions, just the letter/number. You must answer in complete sentences for credit.

**Vocabulary:** cell membrane, cell wall, centriole, chloroplast, cytoplasm, endoplasmic reticulum, Golgi apparatus, lysosome, mitochondria, nuclear membrane, nucleolus, nucleus, organelle, plastid, ribosome, vacuole, vesicle

### Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

1. What are some of the structures inside a cell that help it to live and perform its role in an organism? What do these structures do?
2. How do you think plant cells differ from animal cells? (Hint: What can plants do that animals cannot?)

### Gizmo Warm-up

The *Cell Structure Gizmo™* allows you to look at typical animal and plant cells under a microscope. On the **ANIMAL CELL** tab, click **Sample** to take a sample of an animal cell. Use the **Zoom** slider to see the cell at a magnification of 2000x (2000 times larger than normal). On the dropdown menu, select **Centrioles**.

1. Use the up/down and left/right sliders to manipulate the cell. Find the red arrow pointing to the **centrioles**. Make a sketch of the centrioles in the space below.
2. Read the description of the centrioles. What is their function?

**Machine Learning in Chemistry** Hugh M. Cartwright, 2020-07-15 Progress in the application of machine learning ML to the physical and life sciences has been rapid A decade ago the method was mainly of interest to those in computer science departments but more recently ML tools have been developed that show significant potential across wide areas of science There is a growing consensus that ML software and related areas of artificial intelligence may in due course become as fundamental to scientific research as computers themselves Yet a perception remains that ML is obscure or esoteric that only computer scientists can really understand it and that few meaningful applications in scientific research exist This book challenges that view With contributions from leading research groups it presents in depth examples to illustrate how ML can be applied to real chemical problems Through these examples the reader can both gain a feel for

what ML can and cannot so far achieve and also identify characteristics that might make a problem in physical science amenable to a ML approach This text is a valuable resource for scientists who are intrigued by the power of machine learning and want to learn more about how it can be applied in their own field     The Elements of Instruction Michael H. Molenda,Deepak Prem Subramony,2020-10-26 The Elements of Instruction provides a common vocabulary and conceptual schema of teaching and learning that is fully applicable to all forms of instruction in our digital centric era This critical examination of educational technology s contemporary semantics and constructs fills a major gap in the logical foundations of instruction with special attention to the patterns of communication among facilitators learners and resources The book proposes a new framework for organizing research and theory clear concepts and definitions for its basic elements and a new typology of teaching learning arrangements to simplify the selection of optimal conditions for a variety of learning goals As trends in media technology and methodology continue to evolve these historically contextual back to basics pedagogical tools will be invaluable to all instructional designers and educational researchers     **The Software Encyclopedia 2001** ,2001

essential to acknowledge the dedication and hard work put in by the faculty authors and experts in compiling this collection. Their commitment to academic excellence is reflected in the quality of solutions provided ensuring that you receive the best possible guidance for your AI studies. Approach each solved paper with curiosity and diligence treating it not only as a test of your current understanding but also as an opportunity for growth and improvement. In conclusion, 10 Years Solved IGNOU Papers Key Features Include Extensive Analysis of Solved Papers. Each chapter focuses on a specific year's exam providing detailed solutions and explanations that clarify the rationale behind each answer helping you understand the intricacies of question framing and answer selection. Theoretical Insights and Practical Examples To supplement the solved papers we provide theoretical insights and practical examples that explain complex AI concepts ensuring a well-rounded understanding. Mock Tests and Self Assessment To mimic examination conditions and test your readiness we include mock tests crafted from unsolved questions and typical exam questions accompanied by self assessment tools that help you track your progress and identify areas needing improvement. Expert Tips and Examination Strategies Gain from insights provided by experts who have a profound understanding of the IGNOU exams. These tips are designed to enhance your examination tactics and time management skills. Artificial Intelligence is more than just a compilation of solved papers; it is a companion on your academic journey providing guidance, insights, and a roadmap to success. Embrace the challenges, enjoy the process of learning, and let this book be your trusted ally in mastering the exciting and evolving field of Artificial Intelligence.

*Digital Learning and Teaching in Chemistry* Yehudit Dori, Courtney Ngai, Gabriela Szteinberg, 2023-07-12. Education is always evolving and most recently has shifted to increased online or remote learning. *Digital Learning and Teaching in Chemistry* compiles the established and emerging trends in this field specifically within the context of learning and teaching in chemistry. This book shares insights about five major themes: best practices for teaching and learning digitally, digital learning platforms, virtual visualisation and laboratory to promote learning in science, digital assessment and building communities of learners and educators. The authors are chemistry instructors and researchers from nine countries contributing an international perspective on digital learning and teaching in chemistry. While the chapters in this book span a wide variety of topics as a whole they focus on using technology and digital platforms as a method for supporting inclusive and meaningful learning. The best practices and recommendations shared by the authors are highly relevant for modern chemistry education as teaching and learning through digital methods is likely to persist. Furthermore, teaching chemistry digitally has the potential to bring greater equity to the field of chemistry education in terms of who has access to quality learning and this book will contribute to that goal. This book will be essential reading for those working in chemical education and teaching. Yehudit Judy Dori is internationally recognised, formerly Dean of the Faculty of Education of Science and Technology at the Technion Israel Institute of Technology and won the 2020 NARST Distinguished Contributions to Science Education through Research Award DCRA for her exceptional research contributions.
