Essential Physics for Manual Medicine E-Book Martin Ferrier

Young, 2009-09-16 A textbook that covers Physical concepts at a basic level for manual therapists specifically Clinicians in general and manual therapists in particular have a need to understand certain specific aspects of physics to an advanced level However many lack prior education in this area with chemistry and biology A levels being emphasized in terms of entrance requirements Most textbooks aimed at this field concentrate exclusively on the physics underpinning biomechanics but the level at which these books are pitched is often too high to allow understanding by students who have an inadequate background in the subject This book acts in part as a primer to address this deficit Students are also required to understand the basic physics underpinning physiology biochemistry radiography and therapeutics This textbook will be a guide to these specialist areas of knowledge This text will cover biophysics as a core subject to guide the potential clinician from total ignorance to complete mastery in the areas of physics pertinent to manual medicine and its related disciplines Self

assessment questions at the beginning of each chapter allow readers to check their existing knowledge prior to reading the chapter Each section builds from basic principles to advanced levels Clinical focus **Ballistics in the Seventeenth**

with Galileo and by the remarkable surviving letters of Galileo s daughter a cloistered nun Dava Sobel has written a biography unlike any other of the man Albert Einstein called the father of modern physics indeed of modern science altogether Galileo s Daughter also presents a stunning portrait of a person hitherto lost to history described by her father as a woman of exquisite mind singular goodness and most tenderly attached to me Galileo s Daughter dramatically recolors the personality and accomplishment of a mythic figure whose seventeenth century clash with Catholic doctrine continues to define the schism between science and religion Moving between Galileo s grand public life and Maria Celeste s sequestered world Sobel illuminates the Florence of the Medicis and the papal court in Rome during the pivotal era when humanity s perception of its place in the cosmos was about to be overturned In that same time while the bubonic plague wreaked its terrible devastation and the Thirty Years War tipped fortunes across Europe one man sought to reconcile the Heaven he revered as a good Catholic with the heavens he revealed through his telescope With all the human drama and scientific adventure that distinguished Dava Sobel s previous book *Longitude* Galileo s Daughter is an unforgettable story **Prelude**
