Engineering the Human Bert Jaap Koops, Christoph H. Lüthy, Annemiek Nelis, Carla Sieburgh, J.P.M. Jansen, Monika S. Schmid, 2013-02-12 The volume is collection of articles treating the topic of human improvement enhancement from a variety of perspectives philosophical literary medical genetic sociological legal etc The chapters in this volume treat not only those aspects that most immediately come to mind when one thinks of human enhancement such as genetic engineering cloning artificial implants and artificial intelligence etc Somewhat less obvious aspects include evolutionary perspectives in connection with the prolongation of the human lifespan plastic surgery since its beginnings and questions such as whether the distinction between natural and artificial can really be drawn at all and how it has been conceived across the ages or what the legal implications are of recent developments and techniques Many papers make links to the representation of these developments in popular culture from Jules Verne through Aldous Huxley to the movie *Gattaca* address the hopes and fears that come with them as well as the question how realistic these are While all chapters are written by scientists at the international top of their respective fields all are accessible to a non specialist audience and eminently readable We believe that they represent a state of the art overview of questions that are of interest to a large audience The book thus targets a non specialist audience with an interest in philosophical sociological scientific and legal issues involved in both traditional and recent matters concerning the desire of mankind to improve itself the human body the human mind and the human condition It is unique in that it brings together all these aspects within a coherent and cohesive collection **Classic Questions and Contemporary Film** Dean A. Kowalski, 2015-08-17 Featuring significant revisions and updates *Classic Questions and Contemporary Film An Introduction to Philosophy* 2nd Edition uses popular movies as a highly accessible framework for introducing key philosophical concepts Explores 28 films with 18 new to this edition including *Eternal Sunshine of the Spotless Mind* *Hotel Rwanda* *V for Vendetta* and *Memento* Discusses numerous philosophical issues not covered in the first edition including a new chapter covering issues of personal identity the meaningfulness of life and death and existentialism Offers a rich pedagogical framework comprised of key classic readings chapter learning outcomes jargon free argument analysis critical thinking and trivia questions a glossary of terms and textboxes with notes on the movies discussed Revised to be even more accessible to beginning philosophers **The Picture of Health** Henri Colt, Silvia Quadrelli, Friedman Lester, 2011-05-10 Film and literature have long been mined for interesting examples and case studies in order to teach biomedical ethics to students This volume presents a collection of about 80 very brief accessible essays written by international experts from medicine social sciences and the humanities all of whom have experience using film in their teaching of medical ethics Each essay focuses on a single scene and the ethical issues it raises and the volume editors have provided strict guidelines for what each essay must do while also allowing for some creative freedom While some of the films are obvious candidates with medical themes *Million Dollar Baby* *The Diving Bell and the Butterfly* some are novel

choices such as *Pan's Labyrinth* or *As Good as It Gets*. The book will contain several general introductory chapters to major sections and a complete filmography and cross index at the end of the book where readers can look up individual films or ethical issues.

Film and Philosophy, 2007 *The Routledge Companion to Leadership* John Storey, Jean Hartley, Jean-Louis Denis, Paul 't Hart, David Ulrich, 2016-09-13 Leadership has never been more important and divisive than it is today. The idea and discourse of the leader remains a critical factor in organizational and societal performance but there is evident tension between the persistent focus on the critical importance of individual leaders and the increasing emphasis on collective leadership. *The Routledge Companion to Leadership* provides a survey of the contentious and dynamic discipline of leadership. This collection covers key themes in the field including advances in leadership theory, leadership in a range of contexts and geographies, leadership failure, leadership process and leadership development. Topics range from micro studies to wider political analyses of leadership taking in unusual but important aspects such as portrayals of leadership in architecture, media and science fiction. Contributions from 61 internationally renowned authors from 16 countries make available the full range of perspectives, approaches and insights on the idea of leadership. Providing both a social sciences and a psychological approach, these go beyond common themes to offer diverse perspectives on such topics as emotion and leadership, portrayals of leadership. This volume situates leadership debates and evidence within contemporary leadership crises while ensuring that the explorations of the issues are of enduring relevance. With wide and critical coverage of the key topics and potent contextualization of themes in current events, *The Routledge Companion to Leadership* is the ideal resource for graduate study in leadership.

Bioethics at the Movies Sandra Shapshay, 2009-01-28 D Thomas R Cole, University of Texas Health Science Center at Houston, Metapsychology

Ending Life Margaret Pabst Battin, 2005-05-05 Margaret Pabst Battin has established a reputation as one of the top philosophers working in bioethics today. This work is a sequel to Battin's 1994 volume *The Least Worst Death*. The last ten years have seen fast moving developments in end of life issues from the legalization of physician assisted suicide in Oregon and the Netherlands to furor over proposed restrictions of scheduled drugs used for causing death and the development of NuTech methods of assistance in dying. Battin's new collection covers a remarkably wide range of end of life topics including suicide prevention, AIDS, suicide bombing, serpent handling and other religious practices that pose a risk of death, genetic prognostication, suicide in old age, global justice and the duty to die, and physician assisted suicide and euthanasia in both American and international contexts. As with the earlier volume, these new essays are theoretically adroit but draw richly from historical sources, fictional techniques and ample factual material.

Philosophy Through Film Mary M. Litch, 2002 *Philosophy Through Film* offers a stimulating new way to explore the basic questions of philosophy. Each chapter uses a popular film to examine one such topic from free will and skepticism to personal identity and artificial intelligence in an approachable yet philosophically rigorous manner. A wide range of films are discussed including more recent releases like *Being John Malkovich*, *Total Recall* and *Boys Don't Cry* and classics like

Rashomon and Crimes and Misdemeanors all readily available through major video rental chains This unique and engaging introduction provides an exciting new way to learn about philosophy and connects complicated philosophical questions to the familiar settings of popular culture

Genetic Information Alison K. Thompson, Ruth F. Chadwick, 2007-07-23 It is difficult to think of an example of an advancement in the biological sciences that has had an impact on society similar to that of the new genetics Recent developments in biotechnology have occasioned much discussion among academics professionals and lay people alike In particular many questions and concerns have arisen over the acquisition access and control of genetic information There are several reasons why the new genetics has commanded such widespread attention and why it is now the subject of considerable debate Special reference is given in this volume to the implications of genetic information for five different subject areas eugenics the insurance industry the commercialisation of genetic testing strategies for raising public awareness and the value of theoretical ethical and sociological frameworks in the debate This diverse collection of papers attempts to address and critically discuss issues surrounding the control of and access to genetic information from ethical medical legal and theoretical points of view The first and shortest section of the book attempts to address concerns over the eugenic potential of new biotechnologies It also provides a historical context for the debate for controversy over the subject of eugenics predates the current debate over genetic information by a considerable length of time Indeed by the time the first patent was issued for Chakrabarty's strain of oil eating bacteria in the early 1970s the term eugenics had already acquired strong pejorative connotations

Making Sense of Nature Noel Castree, 2013-08-15 We listen to a cacophony of voices instructing us how to think and feel about nature including our own bodies The news media wildlife documentaries science magazines and environmental NGOs are among those clamouring for our attention But are we empowered by all this knowledge or is our dependence on various communities allowing our thoughts sentiments and activities to be unduly governed by others Making Sense of Nature shows that what we call nature is made sense of for us in ways that make it central to social order social change and social dissent By utilising insights and extended examples from anthropology cultural studies human geography philosophy politics sociology science studies this interdisciplinary text asks whether we can better make sense of nature for ourselves and thus participate more meaningfully in momentous decisions about the future of life human and non human on the planet This book shows how nature can be made sense of without presuming its naturalness The challenge is not so much to rid ourselves of the idea of nature and its collateral concepts such as genes but instead we need to be more alert to how why and with what effects ideas about nature get fashioned and deployed in specific situations Among other things the book deals with science and scientists the mass media and journalists ecotourism literature and cinema environmentalists advertising and big business This innovative text contains numerous case studies and examples from daily life to put theory and subject matter into context as well as study tasks a glossary and suggested further reading The case studies cover a range of topics range from forestry in Canada and Guinea to bestiality in

Washington State to how human genetics is reported in Western newspapers to participatory science experiments in the UK Making Sense of Nature will empower readers from a wide range of fields across the social sciences humanities and physical sciences (Per)Versions of Love and Hate Renata Salecl,2000-06-17 Why when we are desperately in love do we endlessly block union with our love object Why do we often destroy what we love most Why do we search out the impossible object Is it that we desire things because they are unavailable and therefore to keep desire alive we need to prevent its fulfillment Renata Salecl explores the distributing and complex relationships between love and hate violence and admiration libidinal and destructive drives through an investigation of phenomenon as diverse as the novels *The Age of Innocence* and *The Remains of the Day* classic Hollywood melodramas the Sirens song Ceau escu s Rumania and the Russian performance artist Oleg Kulik who acts like a dog and bites his audience *Per Versions of Love and Hate* presents a unique and timely intervention in contemporary debates by questioning the legitimacy of the calls for tolerance and respect by multiculturalism and exploring practices such as body mutilation as symptoms of the radical change that has affected subjectivity in contemporary society **DNA** James D. Watson,Andrew Berry,Kevin Davies,2017-08-22 The definitive insider s history of the genetic revolution significantly updated to reflect the discoveries of the last decade James D Watson the Nobel laureate whose pioneering work helped unlock the mystery of DNA s structure charts the greatest scientific journey of our time from the discovery of the double helix to today s controversies to what the future may hold Updated to include new findings in gene editing epigenetics agricultural chemistry as well as two entirely new chapters on personal genomics and cancer research This is the most comprehensive and authoritative exploration of DNA s impact practical social and ethical on our society and our world Handbook of Research on Science Literacy Integration in Classroom Environments Tai, Chih-Che,Moran, Renee M. Boone, Kevin C. Neece, 2016-12-13 The Abolition of Man C. S. Lewis's masterpiece in ethics and the philosophy of science warns of the danger of combining modern moral skepticism with the technological pursuit of human desires The end result is the final destruction of human nature From Brave New World to Star Trek from steampunk to starships science fiction film has considered from nearly every conceivable angle the same nexus of morality technology and humanity of which C. S. Lewis wrote As a result science fiction film has unintentionally given us stunning depictions of Lewis's terrifying vision of the future In Science Fiction Film and the Abolition of Man scholars of religion philosophy literature and film explore the connections between sci fi film and the three parts of Lewis's book how sci fi portrays Men without Chests incapable of responding properly to moral good how it teaches the Tao or The Way and how it portrays The Abolition of Man **Numerical Simulation, An Art of Prediction, Volume 2** Jean-François Sigrist, 2020-01-08 Numerical simulation is a technique of major importance in various technical and scientific fields Whilst engineering curricula now include training courses dedicated to it numerical simulation is still not well known in some economic sectors and even less so among the general public Simulation involves the mathematical modeling of the real world coupled with the computing power offered by modern technology Designed to perform virtual experiments

digital simulation can be considered as an art of prediction Embellished with a rich iconography and based on the testimony of researchers and engineers this book shines a light on this little known art It is the second of two volumes and gives examples of the uses of numerical simulation in various scientific and technical fields agriculture industry Earth and universe sciences meteorology and climate studies energy biomechanics and human and social sciences *The Failure of Evangelical Mental Health Care* John Weaver,2014-11-17 In the evangelical community a variety of alternative mental health treatments deliverance exorcism biblical counseling reparative therapy and many others have been proposed for the treatment of mentally ill female and LGBT evangelicals This book traces the history of these methods focusing on the major proponents of each therapeutic system while also examining mainstream evangelical psychology The author concludes that in the majority of cases mental disorders are blamed on two main issues sin and demonic possession oppression and that as a result some communities have become a mental health underclass who are ill served or oppressed by both alternative and mainstream evangelical therapeutic systems He argues that the only recourse left for mentally ill female and LGBT evangelicals is to rally for reform and increased accountability for both professional and alternative evangelical practitioners
