Resources in Education ,1990 **Reader's Guide to the History of Science** Arne Hessenbruch,2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn **The Graduate Student's Guide to Numerical Analysis '98** Mark Ainsworth,Jeremy Levesley,Marco Marletta,2012-12-06 The Eighth EPSRC Numerical Analysis Summer School was held at the University of Leicester from the 5th to the 17th of July 1998 This was the third Numerical Analysis Summer School to be held in Leicester The previous meetings in 1992 and 1994 had been carefully structured to ensure that each week had a coherent theme For the 1998 meeting in order to widen the audience we decided to relax this constraint Speakers were chosen to cover what may appear at first sight to be quite diverse areas of numerical analysis However we were pleased with the extent to which the ideas cohered and particularly enjoyed the discussions which arose from differing interpretations of those ideas We would like to thank all six of our main speakers for the care which they took in the preparation and delivery of their lectures In this volume we present their lecture notes in alphabetical rather than chronological order Nick Higham Alastair Spence and Nick Trefethen were the speakers in week 1 while Bernardo Cockburn Stig Larsson and Bob Skeel were the speakers in week 2 Another new feature of this meeting compared to its predecessors was that we had invited seminars A number of established academics based in the UK were asked to participate in the afternoon seminar program **Magill's Medical Guide** Salem Press,Nancy A. Li,2018-01-30 This text provides essential modeling skills and methodology for the study of infectious diseases through a one semester modeling course or directed individual studies The book includes mathematical descriptions of epidemiological concepts and uses classic epidemic models to introduce different mathematical methods in model analysis Matlab codes are also included for numerical implementations It is primarily written for upper undergraduate and beginning graduate students in mathematical sciences who have an interest in mathematical modeling of infectious diseases Although written in a rigorous mathematical manner the style is not unfriendly to non mathematicians Scientific and Technical Aerospace Reports ,1986 Guide to OCR for Arabic Scripts Volker Märgner,Haikal El Abed,2012-07-03 This Guide to OCR for Arabic Scripts is the first book of its kind specifically devoted to this emerging field Topics and features contains contributions from the leading researchers in the field with a Foreword by Professor Bente Maegaard of the University of Copenhagen presents a detailed overview of Arabic character recognition technology covering a range of different aspects of pre processing and feature extraction reviews a broad selection of varying approaches including HMM based methods and a recognition system based on multidimensional recurrent neural networks examines the evaluation of Arabic script recognition systems discussing data collection and annotation benchmarking strategies and handwriting recognition competitions describes numerous applications of Arabic script recognition technology from historical Arabic manuscripts to online Arabic recognition Technical Highlights of the National Bureau of Standards United States. National Bureau of Standards,1962 *Monthly Weather Review* ,1993 **A Guide to the Literature on Semirings and their Applications in Mathematics and Information Sciences** K. Glazek,2013-06-29 This volume presents a short guide to the extensive literature concerning semirings along with a complete bibliography The literature has been created over many years in variety of languages by authors representing different schools of mathematics and working in various related fields In many instances the terminology used is not universal which further compounds the difficulty of locating pertinent sources even in this age of the Internet and electronic dissemination of research results So far there has been no single reference that could guide the interested scholar or student to the relevant publications This book is an attempt to fill this gap My interest in the theory of semirings began in the early sixties when together with Bogdan W glorz I tried to investigate some algebraic aspects of compactifications of topological spaces semirings of semicontinuous functions and the general ideal theory for special semirings Unfortunately local algebraists in Poland told me at that time that there was nothing interesting in investigating semiring theory because ring theory was still being developed However some time later we became aware of some similar investigations having already been done The theory of semirings has remained my first love ever since and I have been interested in the results in this field that have been appearing in literature even though I have not been active in this area myself Energy Research Abstracts ,1980-11 **Subject Guide to Books in Print**
