Gudykunst,2004 This fourth edition builds on the strengths of the previous editions and provides state of the art knowledge about intergroup communication It brings a strong skills oriented approach to improving communication effectiveness between people from different groups cultures ethnic groups social classes      **The Influence of Aural Training in Music on the Perceptive Performance of Adult Learners' Sound-Discrimination Abilities in an Unknown Foreign Language** Friederike Flottmann,2011 Can aural training in music enhance your sound discrimination abilities for languages The study sets off to answer this question by testing 50 German speaking students of non linguistic degrees for their abilities to discriminate between sounds in Finnish a language previously entirely unknown to them 25 randomly selected subjects then went through an aural training in music for two weeks before all the subjects were retested in their aural perceptive abilities in the Finnish language by means of a similar test containing different test items The hypothesised positive effect of the musical intervention could be partially proved by a statistically significant mean enhancement in the final scores achieved by the trained group compared to an insignificant enhancement achieved by the control group      Japanese Questions: Discourse, Context and Language Lidia Tanaka,2014-11-20 Questions and interrogatives in Japanese discourse have attracted considerable interest from grammarians but the communicative aspect has received little attention This book fills this gap Through detailed analyses of formal and informal interactions this book demonstrates that the inherent multi functional and polysemous aspect of language can also be observed in the use of questions What emerges is a sense of the

considerable variety of question forms and also an understanding of how questions are used to perform a wide range of social actions The importance of context is stressed throughout the book both in guiding the speakers choices of question types and in helping to create the particular stance that characterizes those interactions The data used in this book shows that speakers prefer questions that are not canonical When speakers do use canonical questions these are overwhelmingly accompanied by some mollifiers This phenomenon suggests that in Japanese communication the illocutionary force of canonical questions is too strong To soften the interaction speakers tend to use other types of interrogative forms such as statements with rising intonation or at least to leave questions grammatically unfinished The findings in this book contribute to the understanding of how Japanese speakers use questions in different communicative interactions and provide new evidence of the gap between prescriptive grammar and actual communication

**Being and Nothing** Lorenz B. Puntel,2025-05-15 In this masterful work leading German philosopher Lorenz B Puntel answers the primordial question of philosophy Why is there Being at all and not absolutely nothing Considering the history of philosophy from Parmenides through to Heidegger and beyond Puntel charges philosophy with persistently failing to adequately confront the question of Being In response Puntel sets out a systematic philosophy to rival Hegel s Science of Logic and Whitehead s Process and Reality In two parts the book first surveys the history of Western philosophy through the theoretical framework of Structural

Systematic Philosophy SSP which unites continental philosophy's comprehensiveness with the precision and linguistic rigor of the analytic tradition. Analysing all of the major stages in the forgetfulness of Being in Western philosophy, Puntel establishes a dialogue with a vast number of thinkers and movements in the history of philosophy including Plato, Aquinas, Duns Scotus, Francisco Suarez, Christian Wolff, Leibniz, Hegel, Nietzsche, Heidegger, Sartre, W. O. Quine, Peter van Inwagen, Kit Fine, Alexius Meinong, and Jean-Luc Marion. The second part develops the methodical question of a systematic theory of Being. Puntel sets out a universal metaphysics introducing concepts of world existence and types of beings. Moreover, he examines the plurality of possible worlds, the disclosure of Being, and modern philosophies of subjectivity since Kant, including the analytic philosophies of Robert Brandom and Ernst Tugendhat. The book culminates in a theory of Being and explains the relation of Being to the concept of God. Being and Nothing is the third in Puntel's trilogy comprising *Structure and Being* (2008) and *Being and God* (2011) and is a book that will appeal to all those with an interest in the history of philosophy, continental philosophy, theology, and analytic philosophy.
