

Harvard Formatting and Style Guide

Cover Page

Harvard formatting requires a very specific title page. About halfway down the page is the title of the paper, in all capital letters. Following this (about three lines down) is the name of the author. This is not in capital letters. Move four lines down and then put the name of the class, and, on the line after that, the name of the professor. Next line is the name of the school, then the city and state where it is located, and, finally the date.

Header

The header contains a short description of the title and a sequential the page number. Using the example title "The American Presidency"... a partial title and page number in Harvard format could look like:

Presidency 1

There are several key components to note. First, the title is **right** justified instead of the normal left or center. There is only **a partial title** expressing the main idea in the essay. Between the partial title and the number are **exactly five spaces**. Always use the space bar and use just five spaces. To access the header in MS WORD, go to the top of any page in the document and double click. A blue dotted line will appear with a small box on the lower left-hand corner that reads "Header" and above this will be your cursor. A box will drop down simultaneously. Click the "Page Number" box and follow these directions. Click on the first option- "Top of the Page." Then click the one that reads "Plain Number 3." A number corresponding to the page you are on will appear on the right-hand side of the header. The cursor is now on the left side of the number. Type your partial title and then press the space bar exactly five times. Now double click anywhere in the body of the main document and the page number header is set.
