Short Circuiting Policy Leah Cardamore Stokes,2020 In 1999 Texas passed a landmark clean energy law beginning a groundswell of new policies that promised to make the US a world leader in renewable energy As Leah Stokes shows in Short Circuiting Policy however that policy did not lead to momentum in Texas which failed to implement its solar laws or clean up its electricity system Examining clean energy laws in Texas Kansas Arizona and Ohio over a thirty year time

frame Stokes argues that organized combat between advocate and opponent interest groups is central to explaining why states are not on track to address the climate crisis She tells the political history of our energy institutions explaining how fossil fuel companies and electric utilities have promoted climate denial and delay Stokes further explains the limits of policy feedback theory showing the ways that interest groups drive retrenchment through lobbying public opinion political parties and the courts More than a history of renewable energy policy in modern America Short Circuiting Policy offers a bold new argument about how the policy process works and why seeming victories can turn into losses when the opposition has enough resources to roll back laws

When Care is Conditional Dani Carrillo, 2024-01-08 From its inception the public safety net in the United States has excluded many people because of their race gendered roles or other factors As a result they must prove their moral worthiness to get resources for themselves and their families In When Care Is Conditional sociologist Dani Carrillo reveals the ramifications of this conditional safety net by focusing on one particularly vulnerable population undocumented immigrants Through in depth interviews with Latinx immigrants in northern California Carrillo examines three circumstances place gender and immigration status that intersect to influence an individual's access to health care food assistance and other benefits She demonstrates that place of residence affects undocumented immigrants ability to get care since more services are available in urban areas where many immigrants cannot afford to live than suburban areas where public transportation is limited She also shows that while both men and women who are undocumented have difficulty obtaining care men often confront more challenges Undocumented women who are pregnant or mothers are eligible for some government safety net programs and rely on informal coethnic networks or a guiding figure a relative friend neighbor or coworker who explains how to get care and makes them feel confident in accessing it Most undocumented men in contrast are not eligible for public programs except in a medical emergency and often lack someone to guide them directly to care Men sometimes steer one another to jobs through worker centers where they may learn about various services and take advantage of those that increase their

employability like English or computer classes but a culture of masculinity leads them to downplay medical problems and seek health care only in a crisis As undocumented immigrants navigate this exclusionary system Carrillo finds that they resist the rhetoric stigmatizing them as lawbreakers Dismissing the importance of papers and highlighting their work ethic they question the fairness of U S immigration policies and challenge ideas about who deserves care Carrillo offers concrete recommendations such as improving labor conditions and reexamining benefit eligibility to increase access to care for not only undocumented immigrants but also people who have been excluded because of their race criminal record gender identity sexual orientation or disability She argues that working with and across populations creates a powerful form of solidarity in advocating for inclusive care When Care Is Conditional provides compelling insights into how safety net and immigration policies intersect to affect people s everyday lives and calls for a cultural shift so that the United States can provide unconditional care for all
