Iready Math Question:

Navigating MathLand Linda Kasal Fusco, 2017-06-21 Navigating MathLand uses a unique lens to focus on how students prefer to learn mathematics. The intent of this book is to provide a guide for parents to help them navigate the thirteen years of their children's math education K-12. The book will provide parents with the knowledge and skills they will need to proactively advocate for their children's preparation for the 21st century workforce. When Music Goes to School Danette Littleton, 2015-09-04 Experts in child psychology and pedagogy concur that how children are schooled today seriously conflicts with how they learn and develop. Children are being left behind and the promises and possibilities of childhood are slipping away. This book aims to disclose a deeper understanding of music's importance in children's lives and their need to know, explore, wonder, and play. Directed toward music teachers, teacher educators, and scholars, this text invites inquiries and provides insights into contemporary challenges to learning and teaching in an era of standardization. A compendium of essays, classroom voices, and vignettes is supported by relevant research in music education and companion disciplines in psychology, philosophy, and sociology. Storytelling with scholarship contributes authenticity and strengthens the premise of this book.

The Teaching Online Handbook Courtney Ostaff, 2020-11-30 Classroom teachers are increasingly expected to teach online, creating content area courses from scratch with little support or training. But high quality, researched-based online teaching has its own particular set of skills and expectations, and most resources are directed at college-level instructors. This no-nonsense handbook is for that busy classroom teacher with clear techniques for planning instruction and assessment, as well as sections on teaching students with diverse needs and exceptionalities. Based on the author's real-life experiences as an online teacher, there are multiple examples including sample assignments, content areas, rubrics for grading, and sample scripts for parent contact, as well as tips to reduce instructor workload and conduct successful live instruction.

Playful Pedagogy in the Pandemic Emily K. Johnson, Anastasia Salter, 2022-08-26 Educational technology adoption is more widespread than ever in the wake of COVID-19 as corporations have commodified student engagement in makeshift packages marketed as gamification. This book seeks to create a space for playful learning in higher education, asserting the need for a pedagogy of care and engagement, as well as collaboration with students to help us reimagine education outside of prescriptive educational technology. Virtual learning has turned the course management system into the classroom, and business platforms for streaming video have become awkward substitutions for lecture and discussion. Gaming, once heralded as a potential tool for rethinking our relationship with educational technology, is now inextricably linked in our collective understanding to challenges of misogyny, white supremacy, and the circulation of misinformation. The initial promise of games-based learning seems to linger only as gamification, a form of structuring that creates mechanisms and incentives but limits opportunity for play. As higher education teeters on the brink of unprecedented crisis, this book proclaims the urgent need to find a space for playful learning and to find new inspiration in the platforms and interventions of personal gaming and, in turn,

restructure the corporatized surveilling classroom of a gamified world Through an in depth analysis of the challenges and opportunities presented by pandemic pedagogy this book reveals the conditions that led to the widespread failure of adoption of games based learning and offers a model of hope for a future driven by new tools and platforms for personal experimental game making as intellectual inquiry **The A-to-Z Teaching Toolkit for Early Childhood and Elementary Educators**

unprecedented has literally been used thousands of times during 2020 by news outlets in our work environments and in our daily lives And indeed the global pandemic has killed over 600 000 in the United States alone at the time of this writing The public health crisis shut down everything as we knew it Captives of sheltering in place scores of incidents displaying horrific police brutality against people of color streamed live on airwaves north south east and west begetting civil unrest across the country These are circumstances unlike any we have experienced in our lifetimes As historians it is critical that we document this time of crisis so that generations to come can bear witness to this time of turmoil and tragedy With these ideas in mind the American Educational History Journal sought to hear from historians and other scholars about this unique and devastating time in our country s history The Journal honors the traditions of oral history and narrative storytelling as a means to gather the voices of those whose lives have been touched by the COVID 19 crisis literally everyone around the globe This special issue deviates a bit from traditional AEHJ requirements in that we specifically invited narratives not be full blown historical research studies The point of this special issue is for authors themselves to serve as the archival material that will benefit future scholars interested in understanding what it meant to live through this health catastrophe while doing the work of educators We believe we owe it to the historians of the future to share our voices in real time
