

When the outcomes in the sample space of an experiment have the same chance of occurring, the outcomes are said to be

\_\_\_\_\_.

Equally likely outcomes

There is the same chance that the pointer will land on any of the colors.

Not equally likely outcomes

There is a greater chance that the pointer will land on blue than on any other color.

The \_\_\_\_\_ probability of an event is the ratio of the number of ways the event can occur to the total number of equally likely outcomes.

### Theoretical Probability

$$\text{theoretical probability} = \frac{\text{number of ways the event can occur}}{\text{total number of equally likely outcomes}}$$

An experiment in which all outcomes are equally likely is said to be \_\_\_\_\_. You can usually assume that experiments involving coins and number cubes (dice) are fair.

### Finding Theoretical Probability

An experiment consists of rolling a number cube. Find the theoretical probability of each outcome.

(Note the word "experiment" doesn't necessarily mean you are looking for experimental probability.)

A. Rolling a 3.

C. Rolling an even number

B. Rolling a number greater than 3.

D. Rolling a multiple of 3

### Probability Sums

	$P(\text{heads})$	$P(\text{tails})$	$P(\text{heads}) + P(\text{tails})$
Experimental Probability	$\frac{5}{10}$	$\frac{5}{10}$	$\frac{5}{10} + \frac{5}{10} = \frac{10}{10} = 1$
Theoretical Probability	$\frac{1}{2}$	$\frac{1}{2}$	$\frac{1}{2} + \frac{1}{2} = \frac{2}{2} = 1$

The sum of the probability of heads and the probability of tails is 1, or 100%. This is because it is \_\_\_\_\_ that one of the two outcomes will always occur.

The \_\_\_\_\_ of an event is all the outcomes in the sample space that

$$P(\text{event}) + P(\text{complement of event}) = 1$$

**Making Failure Feasible** Thomas H. Jackson,Kenneth E. Scott,John B. Taylor,2015-10-01 In 2012 building off work first published in 2010 the Resolution Project proposed that a new Chapter 14 be added to the Bankruptcy Code exclusively designed to deal with the reorganization or liquidation of the nation s large financial institutions In Making Failure Feasible the contributors expand on their proposal to improve the prospect that our largest financial institutions particularly with prebankruptcy planning could be successfully reorganized or liquidated pursuant to the rule of law and in doing so both make resolution planning pursuant to Title I of Dodd Frank more fruitful and make reliance on administrative proceedings pursuant to Title II of Dodd Frank largely unnecessary This book highlights the problems of dealing with large financial institutions in distress and Chapter 14 s responses to those twin issues The contributors first outline the basic

features of Chapter 14 and point to their continuation as well as additional features to ensure the quick resolution of large financial institutions that would not depend on government discretion and would mesh with emerging ideas about cross border resolution The remaining chapters provide the context for reform and show how Chapter 14 as envisioned in this book would be a substantial advance on administrative focused resolution procedures **HiSET Exam Prep Kaplan Test**
