

Interpreting Actual Measures into Scale Drawings

Look at the building.

This building shows it's actual measurements.

4m x 7cm

What are the actual measurements of this building?

That's right, all measures will be at 1 centimetre high

Scale Drawings

A scale drawing is a drawing of an object that has to use different measures on the drawing.

For example

A wall may have real life measurements of 4m high. However, there is no way you could draw that wall measurements on paper.

For this reason, we use scale drawings.
