- (H) *Suppose that Canada and the United States agree to specialize according to comparative advantage and to the following terms of trade: three tons of wheat for two bolts of cloth. In a production period, there are 60 hours; and before specialization, Canada produced nine tons of wheat and 8.25 bolts of cloth. After specialization and trade with the United States, Canada wants to maintain the nine tons of wheat for each production period. How many bolts of cloth will it have? What are its gains from trade? Canada initially produces 15 bolts of cloth; it will trade six bolts of cloth for nine tons of wheat. Canada will have nine bolts of cloth. It will gain .75 bolts of cloth from specialization and trade.*
