Dr. Melinda Rybski covers four occupational therapy theories related to functional motion that are important for occupational therapists to know. This Third Edition has been updated to reflect the current field and includes new information that has emerged in recent years. New in the Third Edition: Content closely follows AOTA's Occupational Therapy Practice Framework and Occupational Therapy Vision 2025. Updated and more extensive provision of evidence that summarizes key findings in current literature. New theories are presented in the Intervention sections. Extensive joint-specific and theory-based assessments are provided. Interventions described are occupation-based, process-based. Kinesiology concepts presented in a practical, useable way.
