

AP Microeconomics Full Study Guide

economic basics

- scarcity: unlimited wants, limited resources (the fundamental problem of how to allocate resources)
- positive and normative economic statements
 - positive: can be proven or disproven by facts (objective)
 - how things are
 - normative: cannot be proven or disproven by facts (subjective)
 - how things should/shouldn't be
- opportunity cost
 - the value of the next best alternative
 - how to calculate: the value of the other good gained / the value of the good lost

4 types of factors of production

- capital: man made goods used for the production of others
- entrepreneurship: individuals that organize others and risk having a business
- land: any naturally occurring resource
- labor: manpower responsible for generating a good or service

PPF

- any point that falls within the PPF means the country is not fully employing their resources
- linear ppf: constant opp cost (the resources in this economy are capable of producing both goods relatively equally)
- concave PPF: law of increasing opp cost (resources are not suitable for production of both types of goods)
- shifts/rotations
 - changes in the amount of factors of production
 - changes in tech or productivity of the resources
- absolute advantage: a country is capable of producing more of a good given their current resources
- comparative advantage: a country is able to produce a good at a lower opp cost (a country will specialize in that good)
 - output style: given amount of goods a country can produce
 - input style: given a number of resources to produce a unit
- terms of trade are the ratio at which countries trade on good for the other (must fall between the opp costs of producing the goods)

supply and demand model

- demand curve: why is it downward sloping?

Feng Shui: Teaching About Science and Pseudoscience Michael R. Matthews, 2019-07-18 This book provides a richly documented account of the historical cultural philosophical and practical dimensions of feng shui. It argues that where feng shui is entrenched educational systems have a responsibility to examine its claims and that this examination provides opportunities for students to better learn about the key features of the nature of science, the demarcation of science and non-science, the characteristics of pseudoscience and the engagement of science with culture and worldviews. The arguments presented for feng shui being a pseudoscience can be marshalled when considering a whole range of comparable beliefs and the educational benefit of their appraisal. Feng shui is a deeply entrenched three millennia old system of Asian beliefs and practices about nature, architecture, health and divination that has garnered a growing presence outside of Asia. It is part of a comprehensive and ancient worldview built around belief in chi, qi, the putative universal energy or life force that animates all existence, the cosmos, the solar system, the earth and human bodies. Harmonious living requires building in accord with local chi streams; good health requires replenishment and manipulation of internal chi flow and a beneficent afterlife is enhanced when buried in conformity with chi directions. Traditional Chinese Medicine is based on the proper manipulation of internal chi by acupuncture, tai chi and qigong exercise and herbal dietary supplements. Matthews has produced another tour de force that will repay close study by students, scientists and all those concerned to understand science, culture and the science-culture nexus. Harvey Siegel, Philosophy, University of Miami, USA. With great erudition and even greater fluidity of style, Matthews introduces us to this now world-wide belief system. Michael Ruse, Philosophy, Florida State University, USA. The book is one of the best research works published on Feng Shui. Wang Youjun, Philosophy, Shanghai Normal University, China. The history is fascinating. The analysis makes an important contribution to science literature. James Alcock, Psychology, York University, Canada. This book provides an in-depth study of Feng Shui in different periods, considering its philosophical, historical and educational dimensions, especially from a perspective of the demarcation problem between science and pseudoscience. Yao Dazhi, Chinese Academy of Sciences, China. *A New Bibliography of Writings on Varieties of English, 1984-1992/93* Beat Glauser, Edgar W. Schneider, Manfred Görlach, 1993-12-02 The continuing expansion of research in dialectology, sociolinguistics and English as a world language has made the field increasingly difficult to survey. This bibliography is intended to provide a comprehensive overview of the relevant publications of the past few years. Like its predecessor, it will prove an indispensable reference book. The collection is in four parts, dealing respectively with general studies, Britain and Ireland, the United States and Canada, and the rest of the world. There is a joint index in which the 2800 entries are classified according to specific areas, ethnic groups and major linguistic categories, thus making the bibliography easy to use with the greatest profit. The present bibliography complements the one compiled by W. Viereck, E. W. Schneider and M. Görlach, which covered the period from 1965 to 1983 and was published in the same series in 1984. Guide to
