

Lab Report Template - **SAMPLE**

In this sample, the purple areas are completed by the teacher prior to the start of the lab and the orange areas are completed by the student.

NAME: *Suzie Smith*

DATE: *3/29*

LAB NAME: *The difference between chemical and physical changes*

PROBLEM: *How can you determine the difference between a chemical and a physical change?*

OBSERVATIONS: *[please watch the board as we observe a few images that represent chemical or physical changes]*

In the first picture, wood is being cut, but it's still wood, just a different shape. In the second picture, wood is being burned. It's no longer wood, but is now ashes.

HYPOTHESIS:

The difference between a chemical and physical change is that in a chemical change, something new is made, but in a physical change, the substance is not changed into something new.

CONDUCT THE EXPERIMENT:

Record your materials, your experimental design, and the procedures you followed.

Materials:

*Two graduated cylinders
40 mL of vinegar
10 drops of food coloring
1 teaspoon of baking soda*

Procedure:

Step 1: I first will place 20 mL of vinegar in two different graduated cylinders.

Step 2: In one of the graduated cylinders (cylinder A), I will put 10 drops of food coloring. I will observe and then record the changes.

Step 3: In the second graduated cylinder (cylinder B), I will add one teaspoon of baking soda. I will observe and then record the changes.
