Financial Accounting Libby Short 7th Edition:

Financial Accounting Robert Libby, Patricia A. Libby, Daniel G. Short, 2009 Libby Libby Short wrote this text based on their belief that the subject of financial accounting is inherently interesting but financial accounting textbooks are often not. They believe most financial accounting textbooks fail to demonstrate that accounting is an exciting field of study and one that is important to future careers in business. When writing this text they considered career relevance as their guide when selecting material and the need to engage the student as their guide to style pedagogy and design. Libby Libby Short is the only financial accounting text to successfully implement a real world single focus company approach in every chapter. Students and instructors have responded very favorably to the use of focus companies and the real world financial statements. The companies chosen are engaging and the decision making focus shows the relevance of financial accounting regardless of whether or not the student has chosen to major in accounting. Achieving Service Excellence C. M.

Chang, 2013-11-20 As the service sectors play an increasingly important role in all economies worldwide service executives and professionals are well advised to recognize two main pathways to achieving sustainable success in services. The first path requires enhancing the strategic differentiation and operational excellence of their service enterprises; the second requires that these executives and their employees develop the knowledge and skills needed to achieve such success. Specifically this book discusses actionable methodologies needed to generate creative ideas including deciding on which ones to pursue on how to justify projects financially on how to manage the development projects for innovative services and on how to reach out to customers and offer them superior service support. SLA Research and Materials Development for Language

Learning Brian Tomlinson, 2016-05-20 SLA Research and Materials Development for Language Learning is the only book available to focus on the interaction between second language acquisition theory and materials development for language learning. It consists of contributions written by experts in SLA, experts in materials development, researchers who have expertise in both fields, and introductions and conclusions by the editor. The book is organized into four major sections: position statements, materials driven by SLA theory, evaluations of materials in relation to SLA theory, and proposals for action that offer a diverse range of perspectives while maintaining a cohesive and comprehensive overview on the subject. This book is ideal for post graduate courses in applied linguistics and second language acquisition and for researchers interested in the relationship between SLA and materials development.
