never been more important As Robert Yagelski explains in *Writing as a Way of Being* 2011 the ideological and social pressures of our institutions put us under increasing pressure to sacrifice our humanity in the interest of efficiency These problems only grow when we artificially separate self world and mind body in our teaching and everyday experiences Following Yagelski and others *Writing as a Way of Staying Human in a Time that Isn't* proposes that intentional acts of writing can awaken us to our interconnectedness and to ways in which we as individuals and in writing communities might address the social and environmental challenges of our present and future world Featuring essays drawn from a range of contexts including college composition and developmental reading and writing professional and legal writing middle school English dissertation projects academic conferences and an online writing group the collection outlines three ways writing can help us stay human caring for ourselves and others honoring the times and spaces of writing and promoting justice Each essay describes specific strategies for using writing as a means for staying human in inhuman times The authors integrate personal stories descriptions of classroom assignments and activities and current research in writing studies Their work shows that writing can contribute to personal social and political transformation by nurturing vulnerability compassion and empathy among students and instructors alike

of writing and argument The ideas of major theorists of classical and contemporary rhetoric and argument from Aristotle to Burke Toulmin and Perelman are explained and elaborated especially as they inform pedagogies of argumentation and composition The Kalam Cosmological Argument, Volume 2 Paul Copan, William Lane Craig, 2017-11-16 The ancient kalam cosmological argument maintains that the series of past events is finite and that therefore the universe began to exist Two recent scientific discoveries have yielded plausible prima facie physical evidence for the beginning of the universe The expansion of the universe points to its beginning to a Big Bang as one retraces the universe's expansion in time And the second law of thermodynamics which implies that the universe's energy is progressively degrading suggests that the universe began with an initial low entropy condition The kalam cosmological argument perhaps the most discussed philosophical argument for God's existence in recent decades maintains that whatever begins to exist must have a cause And since the universe began to exist there must be a transcendent cause of its beginning a conclusion which is confirmatory of theism So this medieval argument for the finitude of the past has received fresh wind in its sails from recent scientific discoveries This collection reviews and assesses the merits of the latest scientific evidences for the universe's beginning It ends with the kalam argument's conclusion that the universe has a cause a personal cause with properties of theological significance The Works of Monsieur Voiture.
