Beyond Strategic Vision Michael Cowley, Ellen Domb, 2012-08-21 Hoshin is a system which was developed in Japan in the 1960s and is a derivative of Management By Objectives MBO. It is a Management System for determining the appropriate course of action for an organization and effectively accomplishing the relevant actions and results. Having recognized the power of this system, Beyond Strategic Vision tailors the Hoshin system to fit the culture of North American and European organizations. It is a how-to guide to the Hoshin method for executives, managers, and any other professionals who must plan as part of their normal job. The management of an organization, whether it be large or small, has as one of its principal responsibilities setting the direction of the organization for the future. The most effective way to set the future direction is to develop a shared vision of what the organization will be in the future, contrast it to the way the organization is now, and then to create a plan for bridging the gap. The Strategic Plan Beyond Strategic Vision shows you how to do this effectively and efficiently. Michael Cowley has been a teacher and practitioner of management and strategic planning methodologies since 1972. He is a certified instructor for GOAL QPC and has worked with a wide variety of clients in the automotive, manufacturing, financial, military, healthcare, and educational fields. Dr. Cowley is President of Cowley Associates, management consultants in Canelan Bay, California. Ellen Domb is President of the PQR Group, a consulting firm specializing in the application of TQM in Upland, California. She has a successful history of teaching and consulting for planning, management, manufacturing, product development, and business systems. Dr. Domb is the author of numerous articles and books on quality management practices.
