## Chapter 19 - Collective Behaviors What Are Collective Behaviors?

Imagine a football game where the teams never actually touched each other. That's the way things were in college football until a bright idea came up. Quarterbacks noticed that the other teams were trying to spy on their sign language signals. That, in the mid-1900s, the circular football field was a very real thing.

**Revolutionary Commerce** Paul Cheney, 2010-03-16 Combining the intellectual history of the Enlightenment Atlantic history and the history of the French Revolution Paul Cheney explores the political economy of globalization in eighteenth century France The discovery of the New World and the rise of Europe s Atlantic economy brought unprecedented wealth It also reordered the political balance among European states and threatened age old social hierarchies within them In this charged context the French developed a science of commerce that aimed to benefit from this new wealth while containing its revolutionary effects Montesquieu became a towering authority among reformist economic and political thinkers by developing a politics of fusion intended to reconcile France s aristocratic society and monarchical state with the needs and risks of international commerce The Seven Years War proved the weakness of this model and after this watershed reforms that could guarantee shared prosperity at home and in the colonies remained elusive Once the Revolution broke out in 1789 the contradictions that attended the growth of France s Atlantic economy helped to bring down the constitutional monarchy Drawing upon the writings of philosophes diplomats consuls of commerce and merchants Cheney rewrites the history of political economy in the Enlightenment era and provides a new interpretation of the relationship between capitalism and the French Revolution

*French Connections* Andrew N. Wegmann, Robert Englebert, 2020-11-04 French Connections examines how the movement of people ideas and social practices contributed to the complex processes and negotiations involved in being and becoming French in North America and the Atlantic World between the years 1600 and 1875 Engaging a wide range of topics from religious and diplomatic performance to labor migration racialization and both imagined and real conceptualizations of Frenchness and Frenchification this volume argues that cultural mobility was fundamental to the development of French colonial societies and the collective identities they housed Cases of cultural formation and dislocation in places as diverse as Quebec the Illinois Country Detroit Haiti Acadia New England and France itself demonstrate the broad variability of French cultural mobility that took place throughout this massive geographical

space Nevertheless these communities shared the same cultural root in the midst of socially and politically fluid landscapes where cultural mobility came to define and indeed sustain communal and individual identities in French North America and the Atlantic World Drawing on innovative new scholarship on Louisiana and New Orleans the editors and contributors to French Connections look to refocus the conversation surrounding French colonial interconnectivity by thinking about mobility as a constitutive condition of culture from this perspective separate spheres of French colonial culture merge to reveal a broader more cohesive cultural world The comprehensive scope of this collection will attract scholars of French North America early American history Atlantic World history Caribbean studies Canadian studies and frontier studies With essays from established award winning scholars such as Brett Rushforth Leslie Choquette Jay Gitlin and Christopher Hodson as well as from new progressive thinkers such as Mairi Cowan William Brown Karen L Marrero and Robert D Taber French Connections promises to generate interest and value across an extensive and diverse range of concentrations

*Rural Sociology* John Morris Gillette,1922

**The Illusion of Free Markets** Bernard E. Harcourt,2012-11-12 It is widely believed today that the free market is the best mechanism ever invented to efficiently allocate resources in society Just as fundamental as faith in the free market is the belief that government has a legitimate and competent role in policing and the punishment arena This curious incendiary combination of free market efficiency and the Big Brother state has become seemingly obvious but it hinges on the illusion of a supposedly natural order in the economic realm The Illusion of Free Markets argues that our faith in free markets has severely distorted American politics and punishment practices Bernard Harcourt traces the birth of the idea of natural order to eighteenth century economic thought and reveals its gradual evolution through the Chicago School of economics and ultimately into today s myth of the free market The modern category of liberty emerged in reaction to an earlier integrated vision of punishment and public economy known in the eighteenth century as police This development shaped the dominant belief today that competitive markets are inherently efficient and should be sharply demarcated from a government run penal sphere This modern vision rests on a simple but devastating illusion Superimposing the political categories of freedom or discipline on forms of market organization has the unfortunate effect of obscuring rather than enlightening It obscures by making both the free market and the prison system seem natural and necessary In the process it facilitated the birth of the penitentiary system in the nineteenth century and its ultimate culmination into mass incarceration today

**Mainstreaming Pacifism** Sara Trovato,2015-12-24 Mainstreaming Pacifism Conflict success and ethics takes on the challenge of answering the widespread objection that pacifism is ineffective The book proposes a classification of 11 effectual means to an end fraud violence force gain legality masses ideology dialogue humanity time vulnerability and shows how such means have been at work both in the pages of classical political authors Machiavelli Montesquieu Marx and Gandhi and throughout history Such effectual means are not only theoretically described but are related to up to date experimental research are observed in action when conflicts arise and the general laws that

govern their functioning are described The main goal of the book is to show that violence is only one of such potentially successful political means In presence of the political decision to act peacefully in international relations apt combinations of non violent effectual means may succeed over violence The challenge taken on in this book is staying faithful to the topic of political success while offering arguments for a peaceful resolution of conflicts The result is an original cross investigation which gives visibility to an intriguing notion effectuality that has been silently at work throughout political philosophy without ever having been thematized New York Magazine ,1992-02-17 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea *Evaluative Criteria and User Acceptance of End-user Information Technology* Elena Karahanna,1993 **Culture & Progress:Esc V8** Kenneth Thompson,2013-08-21 First published in 2003 This final volume in the VIII volume set titled The Early Sociology of Culture deals with human culture and confines itself neither to contemporary life nor to Western European civilization The author argues that if the volume demonstrates an inadequacy of the methods used in interpreting culture and progress the study is justified The chapters are separated into three parts Culture and Culture Change Theories of Progress and The Criteria of Progress Introducing Urban Anthropology Rivke Jaffe,Anouk de Koning,2015-10-30 This book provides an up to date introduction to the important and growing field of urban anthropology This is an increasingly critical area of study as more than half of the world s population now lives in cities and anthropological research is increasingly done in an urban context Exploring contemporary anthropological approaches to the urban the authors consider How can we define urban anthropology What are the main themes of twenty first century urban anthropological research What are the possible future directions in the field The chapters cover topics such as urban mobilities place making and public space production and consumption politics and governance These are illustrated by lively case studies drawn from a diverse range of urban settings in the global North and South Accessible yet theoretically incisive Introducing Urban Anthropology will be a valuable resource for anthropology students as well as of interest to those working in urban studies and related disciplines such as sociology and geography *Exploring Social Change* Kevin Leicht,Charles Harper,2018-08-15 Exploring Social Change provides a compelling analysis of theories that explain social change innovation social movements and revolution and concludes with reflections about how individuals do and should live in an uncertain and rapidly changing world Written in a personal and clear manner the authors provide definitions of key terms and analysis of theories and ideas from the study of social change The seventh edition includes updated examples reflecting the social changes that have occurred in the world around us including new discussions on the environmental and social landscapes as well as updated methods and discussions that reflect that

Catalogue of the General Theological Library, Boston, Massachusetts General Theological Library,1913 *Canadian Issues in Environmental Ethics* Wesley Cragg,Allan Greenbaum,Alex Wellington,1997-06-10 Is it possible to design a forest policy that satisfies ethical and environmental concerns and is acceptable to business labour and First Nations representatives What is the best path through the tangle of ethical issues surrounding the collapse of the east coast fishery What sort of obligations does a rich nation such as Canada have to satisfy the claims of global environmental justice These are the sorts of issues in applied ethics that are tackled in this collection of essays the vast majority of which have been written especially for this volume It is the first Canadian collection of its kind The book is divided in to sections detailing with such topics as the environment and the economy ethical issues relating to non human animals issues of gender and issues relating to native peoples Most of the authors are philosophers though specialists in geography geology and the social sciences are also among the contributors Frequent reference is made to theoretical ethical concerns but the focus throughout is on applied ethics and a variety of case studies are included Examples include essays on animal rights and the case of native hunters surface mining in Northern Ontario the Quebec arctic and fishing communities in the Maritimes Comparisons are frequently drawn to policies and ethical questions arising in other countries most prominently the United States Children, Young People and Care John Horton,Michelle Pyer,2017-04-28 The very notions of childhood and youth are intimately connected to contemporary norms practices and spaces of care caring and care giving The provision of care is widely figured as both the primary responsibility of parents carers and practitioners who work with children and young people and the primary factor in shaping children and young people s development education socialisation wellbeing and contentment However children and young people themselves are rarely figured as key actors in the provision of care An overwhelming presumption that children and young people are to be cared for has effectively marginalised their agency and responsibilities as carers or in relation to practices and spaces of care Bringing together a significant array of multidisciplinary work on children young people and families this collection draws together new research on the diverse lives

and experiences of children and young people as carers as cared for and in relation to spaces and institutions of care It is the first collection specifically devoted to the subject of care in relation to childhood and youth As such the book will be a key resource for academics practitioners and students seeking leading edge empirical and conceptual material on this topic
