

Current Production Trucks example:

The truck serial number is comprised of three different items; the series, the sequence and the lot number. Example:

ALPHA	CAP	SUF	SEQ [-]	LOT	POM			
P	0232	L	0001	09665		PIC	OPJ	

1. **ALPHA CAP SUF**-The alpha, capacity, and suffix portion of the truck serial number identifies the truck Series, or family name. In the above example the P232L series is comprised of the C20, C25, C30 and C35 model trucks; Internal Combustion, Pneumatic Tire Lift Truck, LPG fueled.

[P]- Pneumatic, [CAP] 232 Capacity range [SUF] - Fuel type L for LPG).

2. **SEQ** - The sequence portion of the serial number indicates the numeric order of the trucks that were built in a particular lot number. In the above example this truck was the number 0001 truck built in lot 9665.

3. **LOT** - A lot number, starting with lot #1 first used in 1954, is a number assigned to a particular series of trucks, which is used internally at the factory to establish and maintain engineering change points. A lot number is never used for more than one series of trucks. In the above example the only truck series built in lot 9665 is the P232L.

4. **POM** - Is the Point of Manufacture, the code depicting the location of the CLARK plant where the truck was produced. There is a Cross reference sheet available in PartsPRO Plus to show the codes and plant locations. The POM may be stamped into the serial number plate either before or after the lot number.

NEVER INPUT ANYTHING INTO THE POM FIELD, IF IT IS NEEDED, PARTSPRO PLUS WILL INSERT IT AS NEEDED.
