

Structured Cabling Services

"Building Scalable Networks"

Are you facing these Infrastructure Challenges?

- Need to create a network infrastructure that is scalable yet easy to manage?
- Are there frequent changes to your network infrastructure that need to be addressed regularly?
- Do you have plans to expand your network infrastructure?
- Do you want an expert's advice on how to standardize your network infrastructure?

If your answer is yes, then Netsol's Structured Cabling Services is the solution...

Why do you need a scalable Structured Cabling System?

In today's competitive business world, enterprises must be able to respond quickly to changes occurring in the market place. For some this means modernizing their data center to meet strict new regulatory requirements while for others it is all about shortening the deployment cycle for new services. All of this adds up to an enterprise's efforts in retaining existing customers and acquiring new ones.

Cabling is the longest life cycle component of the entire network, outlined only by the building shell. A standards compliant cabling system can "future-proof" your network and guarantee continued application support. The evolution of networks continues at a rapid pace, enabling network-wide applications to be deployed to take advantage of networked computing resources in new and innovative ways. When properly deployed and managed, it can have a significant impact on efficiency, including peer-to-peer networks, clustering, and grid computing.

With all the challenges that confront your business, a structured cabling system can help you -

- Alleviate the workflow disruption and network downtime associated with office restructuring
- Accommodate frequent changes
- Provide a universal platform for an overall information systems strategy
- Flexible cabling infrastructure to support multiple voice, data, video and multimedia systems

Bellagio,Shmuel Bashan,2011-06-13 The Complete Guide to

Managing Work Items and Workflow with IBM Rational ClearQuest and IBM Rational Team Concert™ Work items are the lifeblood of software and hardware development. They tell development teams exactly who is doing what, which issues are resolved, which remain unresolved, and which products are impacted. In large team-based projects, however, managing work items can be difficult. Now two IBM Rational experts show how to simplify and improve every aspect of work item management with IBM Rational ClearQuest and the powerful and collaborative Jazz™ based products IBM Rational Team Concert RTC and IBM Rational Quality Manager. Drawing on extensive experience with IBM customers, the authors tightly link theory with proven best practices, offering implementation guidance, detailed examples, and complete solutions. They present innovative solutions, introduce advanced customization techniques, and walk step by step through every phase of workflow development, from requirements through maintenance. They conclude with a full chapter of sample applications and solutions ranging from Collaborative Application Lifecycle Management to SLAs. Coverage includes: Understanding work items and their elements; Using work items for changes, tasks, activities, test plans, test cases, risks, builds, and promotion; Implementing best practices for work item application, planning, analysis, design, development, testing, deployment, and maintenance; Describing workflows, including advanced dynamic workflows; Incorporating roles in work items and using them to meet business needs; Using ClearQuest packages and custom integrations, and making the most of Jazz platform integration technology; Getting the most out of the CQ ALM schema; Implementing effective quality and performance metrics; SLAs and governance; Improving test management with IBM Rational Quality Manager work items; Creating effective workflows for Scrum and other Agile projects. **A guide to the IBM system three hundred seventy model 138**
