Philosophical Neuroethics: A Personalist Approach. Volume 1 James Beauregard, 2019-08-02 Neuroethics is a theoretical and practical discipline that considers the many ethical issues that arise in neuroscience From its inception the field has sought to develop an ethical vision from within the confines of science a task that is both misguided and in the end

impossible Providing a solid theoretical foundation for neuroethics means looking to other sources most specifically to philosophy In this groundbreaking work the author examines the current underpinnings of neuroethical thinking and finds them inadequate to the task of neuroethics to think ethically about persons technology and society Grounded in the physicalist and deterministic presuppositions of contemporary science and drawing on utilitarian thought neuroethics as currently conceived lacks the ability to develop a robust and adequate notion of persons and of ethics Philosophical Neuroethics examines the historical reasons for this state of affairs for the purpose of proposing a more viable alternative drawing on the tradition of personalism for a more adequate metaphysical epistemological anthropological and ethical vision of the human person and of ethics that can serve as a solid foundation for the theory and practice of neuroethical decision making as it touches on the neurologic and psychiatric care of individuals our philosophy of technology and the social implications of neuroscience that touch on public policy neurotechnology the justice system and the military Drawing on the personalist philosophical tradition that emerged in the twentieth century in the works of Mounier Maritain Guardini Wojtyla and the Modern Ontological Personalism of Juan Manuel Burgos Philosophical Neuroethics brings to light the limitations of contemporary neuroethical thinking and sets forth a comprehensive vision of the human person capable of interacting with the contemporary questions raised by neuroscience and technology

Feasting on the Word: Year B, Volume 1 David L. Bartlett, Barbara Brown Taylor, 2008-06-11 With this new

lectionary commentary series Westminster John Knox offers the most extensive resource for preaching on the market today. When complete, the twelve volumes of the series will cover all the Sundays in the three year lectionary cycle along with movable occasions such as Christmas Day, Epiphany, Holy Week, and All Saints Day. For each lectionary text, preachers will find four brief essays, one each on the theological, pastoral, exegetical, and homiletical challenges of the text. This gives preachers sixteen different approaches to the proclamation of the Word on any given occasion. The editors and contributors to this series are world class scholars, pastors, and writers representing a variety of denominations and traditions. And while the twelve volumes of the series will follow the pattern of the Revised Common Lectionary, each volume will contain an index of biblical passages so that nonlectionary preachers as well as teachers and students may make use of its content.

Catherine of Siena Thomas McDermott, 2008. Although Catherine of Siena was proclaimed a Doctor of the Church in 1970, relatively little attention has been given to her mystical thought, particularly in the English speaking world. The Dialogue, the famous compendium of her mature thought, is difficult to understand owing to its interruptions, repetitions, overlapping arguments, imagery, and undefined terms. Thomas McDermott breaks new ground in his systematic presentation of Catherine's teachings. Drawing on the Dialogue and also on Catherine's 381 letters and prayers, he explains clearly her principal teachings in relation to spiritual development and identifies Catherine's possible sources as well as her areas of originality. By examining Catherine's life and mystical experiences, McDermott shows how she herself grew spiritually and how her growth corresponds to her later teaching on the three stairs on the bridge of Christ crucified. Finally, the author puts forward what he regards as the fundamental message of Catherine's life and teaching. Students of mysticism and spirituality will find this book a trustworthy guide through the incredibly rich mysticism of one of the 14th century's most amazing women. **Common**

Good and Self-Interest in Medieval and Early Modern Philosophy Heikki Haara, Juhana Toivanen, 2024-04-03. This open access volume provides an in depth analysis of philosophical discussions concerning the common good and its relation to self interest in the history of Western philosophy. The thirteen chapters explore both renowned and lesser known thinkers from the Middle Ages to the eighteenth century, covering also the relevant ancient background. By bridging the gap between the medieval and early modern periods, they provide fresh insights into how moral and political philosophers understood the concepts of the common good and self interest along with their ethical and political implications. The concept of the common good occupies a central role in philosophical reflections on the public and private dimensions of moral and social life in contemporary debates. By exploring the rich and diverse ways in which the relationship between the common good and self interest has been understood, this volume has the potential to contribute to our ongoing efforts to critically discern the possibilities and limitations of these concepts in the present. Thus, the volume will be useful for scholars interested in the multi layered role of the notion of the common good both in the history of philosophy and in contemporary moral and political philosophy. *Religious Systems of the World*, 1911 **The Medieval Mystical Tradition in England** E.
