Applications of Accounting Information Systems David M. Shapiro,2019-12-06 The revolutionary effects of using accounting information systems by displacing manual information systems in the private and public sectors cannot be overstated The benefits of this substitution of set of processes include increased mathematical accuracy predefined fields and coding tasks and de emphasis of manual clerical labor in favor of labor adept in data processing Reporting can be significantly automated facilitating managerial power and control at a distance and the proliferation of global enterprises The potential detriments are rarely accurately completely and timely addressed as information system vendors management consultants and corporate procurement teams race toward the popularly conceived state of the art Systems are ballyhooed as continually improving in processing speed functionality and capacity Users of these automated systems may not consider big picture effects and they may not intelligently consider the conduct risks to their own enterprises by concentrating such global reach and influence at high levels of senior management without dedicating adequate resources to verifying the accuracy completeness and timeliness of the information systems This book considers these risks

Accounting for Sustainability: Asia Pacific Perspectives Ki-Hoon Lee,Stefan Schaltegger,2018-01-30 This book advances the understanding of corporate sustainability and challenges and roles of sustainability accounting in the Asia Pacific region The Asia Pacific region has shown fast economic growth for several decades which is expected to continue In this context Asia has become the production engine of

the global economy At the same time scientific reports reveal that some planetary boundaries are crossed for example relating to biodiversity and climate change Companies in the Asia Pacific region are therefore increasingly challenged to reduce their environmental impacts to document their social contribution and to contribute to sustainable development Key approaches to identify sustainability problems and challenges to support improvement processes and to back up sustainability contributions include accounting and reporting In contrast to the high relevance of accounting and reporting for corporate sustainability for the Asia Pacific region academic research has so far been dominated by Western researchers and pre dominantly dealt with Western and Japanese cases and approaches It is thus time to take account of Asian perspectives on accounting and reporting for sustainability in the Asia Pacific region
