Multiply by the conversion factor and add to find 1 ft. 3 in. purely in terms of feet

$$1 \text{ in} \times \left(\frac{1 \text{ ft}}{12 \text{ in}} \right) = 0.0833 \text{ ft}$$

This effectively means that there are 0.0833 feet in every inch

$$1 \text{ ft} + 3(0.0833 \text{ ft}) = 1.249 \text{ ft}$$

Aliprantis, Kim C. Border, 2013-03-14 In the nearly five years since the publication of what we refer to as The Hitchhiker s Guide we have been the recipients of much advice and many complaints That combined with the economics of the publishing industry convinced us that the world would be a better place if we published a second edition of our book and made it available in paperback at a more modest price The most obvious difference between the second and the original edition is the reorganization of material that resulted in three new chapters Chapter 4 collects many of the purely set theoretical results about measurable structures such as semirings and algebras The material in this chapter is quite independent from notions

of measure and integration and is easily accessible so we thought it should come sooner We also divided the chapter on correspondences into two separate chapters one dealing with continuity the other with measurability The material on measurable correspondences is more detailed and we hope better written We also put many of the representation theorems into their own Chapter 13 This arrangement has the side effect of forcing the renumbering of almost every result in the text thus rendering the original version obsolete We feel bad about that but like Humpty Dumpty we doubt we could put it back the way it was The second most noticeable change is the addition of approximately seventy pages of new material

Piping and Pipeline Calculations Manual Philip Ellenberger, 2010-01-07 Piping and Pipeline Calculations Manual is a no nonsense guide to the principle intentions of the codes or standards and provides advice on compliance After using this book the reader should come away with a clear understanding of how piping systems fail and what the code requires the designer manufacturer fabricator supplier erector examiner inspector and owner to do to prevent such failures The focus of the book is to enhance participants understanding and application of the spirit of the code or standard and form a plan for compliance The book is enhanced by a multitude of calculations to assist in problem solving directly applying the rules and equations for specific design and operating conditions to illustrate correct applications Each calculation is based on a specific code Written by a professional educator with over 35 years of experience Covers all major codes and standards Demonstrates how the code and standard has been correctly and incorrectly applied
