THE HANDBOOK FOR ESTIMATING and PRODUCT KNOWLEDGE Michael "Terry" Marks,2016-07-29 Scaffolding is used in
many industries every day all over the world in the construction industry for commercial and industrial maintenance the
staging and entertainment markets the shipbuilding industry mining industrial plants including power plants hydro and
nuclear power facilities pulp and paper plants petrochemical plants oil refineries and offshore drilling rigs This book serves
as a guide to any person involved with scaffolding in any way so that they will have a training and reference book that they
can refer to for both scaffolding product knowledge and for estimating The first ten chapters of this book include historical
data and background information including product knowledge on all types of built up scaffolding suspended cradles and
swingstages The eleventh chapter of this book is dedicated to the procedures that are used for estimating preparing
proposals bids and contracts including systematic instructions on how to calculate the formulas that are most commonly used
for estimating materials and labour outputs for scaffolding Additionally there are several sections of this book dedicated to
temporary enclosures built up shoring and falsework as well as manual and motorized suspended swingstages and cradles
There are very few books available on these topics To my knowledge there are none dedicated to product knowledge and the
estimating of built up scaffolding systems No book can be all inclusive and this handbook does not claim to be Much time and
research has been put into this book to ensure that as many of the proven estimating methods and design concepts for all
types of built up and suspended scaffolding have been covered Since one of our greatest assets in any business are our
employees the proper training of all craft and support staff within an industry is of primary importance Additionally the
continuity in the training given to staff should always be kept up to a measurable standard and continually maintained to an
