**Living the Enlightenment** Margaret C. Jacob, 1991-12-26 Long recognized as more than the writings of a dozen or so philosophes the Enlightenment created a new secular culture populated by the literate and the affluent Enamoured of British institutions Continental Europeans turned to the imported masonic lodges and found in them a new forum that was constitutionally constructed and logically egalitarian Originating in the Middle Ages when stone masons joined together to preserve their professional secrets and to protect their wages the English and Scottish lodges had by the eighteenth century discarded their guild origins and become an international phenomenon that gave men and eventually some women a place to vote speak discuss and debate Margaret Jacob argues that the hundreds of masonic lodges founded in eighteenth century Europe were among the most important enclaves in which modern civil society was formed In France the Netherlands Belgium and Britain men and women freemasons sought to create a moral and social order based upon reason and virtue and dedicated to the principles of liberty and equality A forum where philosophers met with men of commerce government and the professions the masonic lodge created new forms of self government in microcosm complete with constitutions and laws elections and representatives This is the first comprehensive history of Enlightenment freemasonry from the roots of the society's political philosophy and evolution in seventeenth century England and Scotland to the French Revolution Based on never before used archival sources it will appeal to anyone interested in the birth of modernity in Europe or in the cultural milieu of the European Enlightenment

glass The philosophers musicologists and art historians who appear in Volume 3 worked in three newly emerging disciplines largely of nineteenth century origin In their distinguished and extraordinary output of energy in scholarly and academic arenas they contributed significantly to the emergence and formation of medieval studies as the prime discipline of historical inquiry into and hence the key to understanding of the human experience
