This volume represents a unique addition to the growing body of empirical literature on materials development adopting a reverse approach to the topic Rather than applying theory to practice practitioners and researchers from 11 countries reappraise applied linguistics theories through practice The book also provides evidence for the diversity of materials development around the globe at different levels for different specialities and for different purposes Each chapter surveys the relevant literature such as task based learning and language and culture describes a specific research project reports the results of the project and discusses the implications of these results for the development of materials both in the local context and in general After each section there are editorial comments highlighting the issues emerging from the research and there is a conclusion which connects the findings of the various chapters and makes suggestions both for future research and for the principled development of materials for L2 learners The book will be suitable for teachers materials developers academics and students in post graduate courses in applied linguistics in TEFL TESOL and in the teaching of other languages as an L2 香港 Hong Kong, 2012-06-29 **Longman's Magazine** Charles James Longman, 1890 Longman's Magazine, 1890

Electing the Pope in Early Modern Italy, 1450-1700 Miles Pattenden, 2017-07-21 Electing the Pope in Early Modern Italy 1450 1700 offers a radical reassessment of the history of early modern papacy constructed through the first major analytical treatment of papal elections in English Papal elections with their ceremonial pomp and high drama are compelling theatre but until now no one has analysed them on the basis of the problems they created for cardinals how were they to agree rules and enforce them How should they manage the interregnum How did they decide for whom to vote How was the new pope to assert himself over a group of men who until just moments before had been his equals and peers This study traces how the cardinals responses to these problems evolved over the period from Martin V's return to Rome in 1420 to Pius VI's departure from it in 1798 placing them in the context of the papacy's wider institutional developments Miles Pattenden argues not only that the elective nature of the papal office was crucial to how papal history unfolded but also that the cardinals of the fifteenth to eighteenth centuries present us with a unique case study for observing the approaches to decision making and problem solving within an elite political group *Electric Words* Yorick Wilks, Brian M. Slator, Louise M. Guthrie, 1996 One of the underlying messages of the book is that current research should be guided by both computational and theoretical tools and not only by statistical techniques that matters have gone far beyond counting to encompass the difficult province of meaning itself and how it can be formally expressed *Themes in West Africa's History* Emmanuel Kwaku Akyeampong, 2006-01-15 There has long been a need for a new textbook on West Africa's history In *Themes in West Africa's History* editor Emmanuel Kwaku Akyeampong and his contributors meet this need examining key themes in West Africa's prehistory to the present through the lenses of their different disciplines The contents of the book

comprise an introduction and thirteen chapters divided into three parts Each chapter provides an overview of existing literature on major topics as well as a short list of recommended reading and breaks new ground through the incorporation of original research The first part of the book examines paths to a West African past including perspectives from archaeology ecology and culture linguistics and oral traditions Part two probes environment society and agency and historical change through essays on the slave trade social inequality religious interaction poverty disease and urbanization Part three sheds light on contemporary West Africa in exploring how economic and political developments have shaped religious expression and identity in significant ways Themes in West Africa s History represents a range of intellectual views and interpretations from leading scholars on West Africa s history It will appeal to college undergraduates graduate students and scholars in the way it draws on different disciplines and expertise to bring together key themes in West Africa s history from prehistory to the present *THE ELECTRIC REVIEW* ,1851 **A Reader's Companion to the Short Story in English** Erin Fallon,R.C.

Feddersen,James Kurtzleben,Maurice A. Lee,Susan Rochette-Crawley,2013-10-31 Although the short story has existed in various forms for centuries it has particularly flourished during the last hundred years Reader s Companion to the Short Story in English includes alphabetically arranged entries for 50 English language short story writers from around the world Most of these writers have been active since 1960 and they reflect a wide range of experiences and perspectives in their works Each entry is written by an expert contributor and includes biography a review of existing criticism a lengthier analysis of specific works and a selected bibliography of primary and secondary sources The volume begins with a detailed introduction to the short story genre and concludes with an annotated bibliography of major works on short story theory

Extracts from Longman's Magazine ,1833 Publishers' circular and booksellers' record ,1847 Network Nation Richard R. John,2015-10-05 The telegraph and the telephone were the first electrical communications networks to become hallmarks of modernity Yet they were not initially expected to achieve universal accessibility In this pioneering history of their evolution Richard R John demonstrates how access to these networks was determined not only by technological imperatives and economic incentives but also by political decision making at the federal state and municipal levels In the decades between the Civil War and the First World War Western Union and the Bell System emerged as the dominant providers for the telegraph and telephone Both operated networks that were products not only of technology and economics but also of a distinctive political economy Western Union arose in an antimonopolistic political economy that glorified equal rights and vilified special privilege The Bell System flourished in a progressive political economy that idealized public utility and disparaged unnecessary waste The popularization of the telegraph and the telephone was opposed by business lobbies that were intent on perpetuating specialty services In fact it wasn t until 1900 that the civic ideal of mass access trumped the elitist ideal of exclusivity in shaping the commercialization of the telephone The telegraph did not become widely accessible until 1910 sixty five years after the first fee for service telegraph line opened in 1845 Network Nation places the history of

telecommunications within the broader context of American politics business and discourse This engrossing and provocative book persuades us of the critical role of political economy in the development of new technologies and their implementation
